Massachusetts Institute
of
Technology
Cambridge

RICHARD C. MACLAURIN, M. A., Sc. D., LL.D.
President

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers courses in Civil, Mechanical, Mining, Electrical, Chemical, Sanitary, and Architectural Engineering; in Chemistry, Electrochemistry, Biology and Public Health, Physics, Geology and Naval Architecture, and in Engineering Administration.

Graduates of colleges and scientific schools of collegiate grade are admitted without examinations, to such advanced standing as is warranted by their previous training.

Correspondence should be addressed to Prof. A. L. Merrill, Secretary of the Faculty.

For college men, business men, professional men, men of sports—baseball, football, golf, tennis, shooting, riding. For everybody, everywhere, the year ’round, Bevo is hale refreshment for wholesome thirst—an invigorating soft drink. Ideal for the athlete or the man in physical or mental training—good to train on and gain on. Healthful and appetizing. It must be ice cold.

ANHEUSER-BUSCH

ST. LOUIS

Serve it cold
Marie Stafford in "The Shubert Gaieties of 1919."
What Every Freshman Should Buy

1. A membership to the Coop. The Coop is so termed because of its ability to "coop" the eagle on the back of every silver dollar ever coined. This costs the sum of one dollar in return for which you get a book and a number. The book is large enough for memoranda of all dates with your girl, or one assignment in Mathematics. We suggest that you use it for the Math as a college man is expected to be able to remember all dates with a girl. The number is for the convenience of the board of directors. At the end of each year, all numbers are put in a hat. The first one drawn out gets one cent dividend, the second two cents, and so on up to $4.97, when they begin over.

2. A set of drawing instruments. There are two reasons for buying this. First—to acquire that peculiar "broke" feeling that every Tech man should have. The Coop makes it a point of honor to see that this is obtained by all. Second—the Coop needs the money. These instruments are guaranteed not to spot the paper until five minutes before the drawing is finished. The set contains several instruments, for which there is no apparent use. These are to be strewn around the table while you work, so that you will look like a regular draftsman.

3. A syllabus of freehand drawing. Don't think that there is any use for this. There isn't. However, it has been the custom in the past to honor the freehand drawing department by buying one. They will appreciate the honor by letting you read the book. A set of drawings of different ways to make one letter also comes with this. These are to impress upon you the brilliancy of the department in figuring out so many different and difficult ways of doing the same thing.

Perditions of Tech, or who said "Tech is Hell"?

Helens of the Freshman Class.

1. At the 'Stute you must work like Helen B. Happy.
2. To be successful, you must work like Helen B. Wise.
3. If a blushing co-ed passes, just strain your eyes like Helen Seymore.
4. If your "slip-stick" or a book is lost, go to Helen Hunt for it.
5. If in the lab. you mix something you know will explode, just run like Helen Awl.

You May Know or You May Not Know

That you can't blow music out of a violin.
A canary doesn't care a whoop whether you yell encore or not.
Goldfish bowls have no cellars, neither do their roofs leak.
A parrot will not talk under water.
In all places but Afghanistan and Harvard, three cushion billiards are played on a table with four cushions.
The best way to look at the Woolworth Building is to buy a picture of it.
Rugs will not wear out if attached to the ceiling.

He: Do you like animals?
She: Are you fishing for compliments?
Don'ts for Freshmen!!!!

Don't

Get discouraged when you have signed your name 4,000 times at registration. You are nearly half through.

Expect too much from the lunchrooms hereabouts. The Copley Plaza is just a little ways across the river.

Touch your hats to the white coated men in the halls. They are the janitors.

Pay a social call on the Dean as soon as you arrive. He will send for you in January, anyway.

Say "God bless my soul" near the Institute. The faculty has granted sole rights to Professor Passano.

Buy a new commutation ticket to Wellesley. Lots of disappointed upperclassmen will sell theirs cheap.

Try to date up the telephone girls for a quiet evening. They are here for strictly business purposes.

Try to cash personal checks at the Bursar's office. Horace has been Bursar for a long time.

Call the assistant instructors "Professor." They MIGHT object.

Make any plans for next July. You will be in Cambridge.

Make red fire in the Chemistry laboratory. We added two fingers and a thumb last year to the collection.

Expect any rebate from your chem. deposit. You will pay more later.

Hunt for the pretty co-ed. She graduated six years ago.

There, there, little Freshie, don't cry. You'll be a Sophomore by and by."

Ye Hungry Wolves

There was a Tech freshman one day, In WALKER he thought he would stay; To the waitress he grinned, "Oats and milk that is thinned— I'm so hungry I'd eat curds and hay."

"My son, there is none left of these; All the oats have gone out on the breeze, And as for some milk It is costly as silk; To live in such times is a squeeze."

At the TAVERN he found there were rolls, And doughnuts consisting of holes; As for milk, he could spy Quite enough for a fly— Said the Waiter, "We need larger bowls."

Then WALTON'S his appetite took, Where the menu is ten dimes a look— If you've money to lend Here's where you can spend All the dough you can make as a crook.

If you search in a good dictionary, You'll find how they feed a canary— In a bowl you could mop They put milk by the drop, Oh, ye gods! and ye FRESHMEN UNWARY.
Just Freshmen

ANDSON—Remember the trials and temptations of the big city. Your underwear once a week, after you have taken your bath, etc. Imagine the change. We will get it.

DO YA MEAN TO TELL ME THIS SMOKER IS FREE? THIS IS SOME PLACE. WE'LL ASK FOR YOUR OPINION LATER.

HERE'S WHERE YOU GET YOUR YEARLY SUBSCRIPTION TO THE TECH AND VOO DOO.

DELIGHTED.

A-TA-BOY, THE MORE YOU PUT IN THE MORE YOU GET OUT!

SIDE THOUGHTS.

GUESS I'M NOT SLOUCH TALKING TO THOSE BIG MEN.

Wearing of the Green.
THE Critical Condition of Technology," as told by Doctor Macauley in the two inside pages of this issue, represents the basic reasons for the Technology Educational Endowment Fund, which has been actively under-way ever since the opening of the Institute this fall. The Corporation Committee headed by General Dupont, '84, and the Alumni Committee headed by Merton L. Emerson, '04, have perfected the organization of the graduates and former students of Technology for this work, and they have found their love for Technology and their willingness to aid and further the interests of this Endowment Fund untiring.

The least that the present undergraduates can do is to prove worthy of this confidence on the part of the alumni since it is those who are now students who will most benefit by the successful raising of the required amount. This campaign is essentially a "Give and Get Campaign"—if you cannot give, you can get; and if you can give, you can also get. This is the aim of those in charge who have asked that the undergraduate body do its part, and it is with this feeling that the Institute Committee has appointed a sub-committee to ask undergraduates to "Give and Get." A thousand dollars has been spoken of as every Tech man's quota, and certainly if every Tech man either "Gives and Gets" a thousand dollars, the Fund needs worry no longer.

HITHERTO, it has been the custom for the freshmen to organize themselves before Field Day; to rally together for a class dinner. As a promoter of class and Institute spirit, the affair has never been without its good points. True it is that the aftermath, taking the shape usually of a parade, has more often than not resulted in the detention at Station 16 of some of that parade's constituent personages, and equally true is it that at this time the State Guard has its hands full directing traffic without the added difficulty of policing a parade route; but, nevertheless, we recommend that the present freshmen at least join in a dinner to pledge their collective individuals to the development in their class of good-fellowship and good Institute spirit.

The All-Technology smoker, to a certain extent, instills the Institute part of the thing and that is as far as it goes. It takes a live class banquet to get the members of the class together as a unit and to get the individuals better acquainted with those with whom during the next four years of their lives they will be intimately connected.
FIELD Day is now a tradition whose origin and history we leave to our contemporary "the Tech." Being a tradition which possesses both an origin and a history, it is worthy of the notice of all undergraduates.

The attendance of each individual at this epic struggle and at its culmination, "Tech Night," is necessary so that each may store up for the future some memory of the years spent here. Aside from representing the ever-present rivalry between the two lower classes, the day represents too, one of the few chances for everyone to get together, chances which, if thrown away, may be checked off as failures to get out of the Institute all the good that there is in it.

If it is necessary to get up an enthusiasm for Field Day, bet on it, and if it is necessary to get up one for Tech Night, procure some of the now unprocurable, but get up the enthusiasm and be on hand.

No editorial page would be complete without mention of the student activities now in existence at the Institute. The need for such an editorial is always present—although happily less this year than ever before. With the largest enrollment the Institute has known, the support accorded all the activities has been gratifying to the extreme.

An excellent barometer of spirit at Technology is the number attending the smokers held at the beginning of the year. Those held so far this year have left nothing to be desired, either in size or enthusiasm there demonstrated. The first of these, the All-Technology smoker, entertained the largest body of undergraduates ever assembled in Walker. The smoker for men from other colleges, at which the Walker Club was host, was one of the best yet given by that organization. And finally, that given by the Show, was well attended and in the words of the prophets: "a fine time was had by all."

One group of activities, which in previous years was granted a proportionately small amount of support, is the Professional Societies. These societies, if supported with some degree of enthusiasm, can be of unlimited good to their members. Introducing, as they do, a more practical side into the study of Engineering. The various organizations attempted the plan this year of conducting their campaigns for membership as a unit and, although definite figures are as yet unavailable, it seems this scheme has proven itself even more successful than hoped for.

The same spirit manifested in the foregoing instances holds in the competitive activities. The Musical Clubs, Tech Show, Technique, and the Field-Day teams are well supplied with candidates for the various advantages they have to offer. The combination of the point system and the large staff which most of the activities carry, make possible the participation therein of a comparatively large number of men. In itself—an excellent point, as the importance of taking part in student organizations is generally conceded.

This is one phase of the question, the other is up to the individual. Student organizations are for the common good. The question is: are you getting your share from them? Do you belong to your professional Society, do you subscribe to the publications and attend the smokers and games given for your benefit? If you don’t do these things, you are missing a great deal of what Technology can give you.

For the second time in as many months the eyes of the United States have been upon Massachusetts. The first occasion was the strike of the Boston policeman; the second, the Gubernatorial race between Governor Coolidge and Mr. Long. The question at issue in both cases was that of law and order against pronounced radicalism. To the credit of the State there no longer remains any doubt as to how her citizens feel upon such a vital matter. They demonstrated this in a very conclusive manner at the polls on Tuesday.

The fight between Coolidge and Long lost, to a great extent, party significance, and fell back almost entirely upon that now old subject—the police strike, which was dealt with so effectively by Governor Coolidge. It is a significant fact that Coolidge’s plurality at this election was about six or seven times higher than when he opposed Long in 1918, showing that he had gained in popularity by reason of his actions while Governor.

The point which may be derived from this election, however, is that the American people will not stand for disorder, ultra-radicalism, or impossible campaign promises, as possibly they did in days of yore; and proves that Americanism, honor, and decency are yet alive in this country of ours; and incidentally shows conclusively why Socialism, Bolshevism, and other kindred ‘isms will be unable to take root in this country. We have no room for them.
Is it any wonder time flies, when the average person's ambition is to kill it?
A pretty girl is like a steamboat. Wherever she goes, the swells follow her.
To stand in front of a bank is a paying proposition, for there's money in it.
Bees are the only winged merchants. They cell their honey.
It is extraordinary that Lot's wife should look around and then turn into a pillar of salt. But it used to be a common occurrence to see a gentleman look around him, and then turn into a saloon.

Only those who remember their first inhale, can realize why cigarettes are called coughin' nails.
Some unfortunate beings always have their hair wet. In fact, it is almost impossible to comb the waves out.
Girls nowadays have stopped carrying their money in their stockings. It isn't the principle of the thing, but the fact that it attracts too much attention.
The City of Happiness is in the State of Mind. Prohibitionists state that water is good. For instance, a teakettle sings when it's full of water. But who the h— wants to be a teakettle?
Book Review

"Things Every Tech Student Should Know" by Arthur Comen Boyle.

Contains explanation of student tax, integral tables, consultation hours of pros' with names of their favorite drink, song, and place to eat. Loose-leaf section giving itemized account of all shows in town with names, ages, and telephone numbers of all girls. List of former saloons for purposes of future and historic (not hysterical) reference. Names of drinks and numbers of Chem. Labs. where ingredients may be obtained. Also directions for mixing, when only a beaker and slide rule are handy. Contains bird's-eye view of Tech and tabular view of Harvard, also why they named the river, "Charles." Almanack giving time of high tide in Nova Scotia and New Hampshire with conversion tables, logarithms, and an essay on "How to Pass Thermo-godamics in Two Years." Published by Doubleday and Cage Co.

Price of book, with either light black or dark black covers and cast-iron Binding, $1.50.

Dorothy: "He" masculine gender, strong, tall; "kissed" active verb, showing affection; "me," Oh, you all know me.

I stood on the bridge at midnight,
The night was full of air,
Somebody took the bridge away
And left me standing there.

At the Studio Tea

The Professor: "She looks a bit racy, but they say her past is pure as Ivory Soap."
His wife: "Yes,—perhaps. But what about that other 56/100 of one per cent?"
The Critical Condition

"The Institute's prestige was never greater nor its opportunities for great men that the unrest that characterizes the times cannot be allayed without great past, increased production will depend on the maintenance of an adequate stream to the Institute from all parts of the country, but Technology cannot be new improvements in all its departments. The various departments are without could not be made were the necessary funds available.

"The Institute has, however, to face a far more serious problem than its opportunities for service are greater than ever before, it is faced with a condition are not speedily provided. This arises from the suddenness with which it was in force before the war has been only slightly increased within the last few months. The average salary of the full professors is now $3600, and only five

"It is unfortunately true that a similar condition regarding salary scale and a adequacy of these salaries falls with peculiar weight on Technology. It different men with a professional training with an easy outlet for their activities out man is so much more generally appreciated in industry than was formerly tempted to leave academic life and enter industrial pursuits. With such a it is found impossible now to get enough first-rate men.

"If this condition continues for five years, the results will be most serious, of the Institute's staff will be depleted of practically all the first-class men except the func tional institution like the success of a business depends primarily on the qu advance but must inevitably decline unless it continues to attract a large no to above, the total salaries of the Instructing Staff amount to more than half appreciable percentage of increase in the salaries will exhaust the income from.

dition of Technology

can national service so good. More than ever before it is appreciated by thoughtful
realty increasing production, and that in the future incomparably more than in the
supply of highly skilled technical men. As a consequence, bright young men have
rise to the level of the opportunity thus presented unless it can continuously make
exception doing excellent work, but there is none in which obvious improvements

that of providing for continuous growth in the future. Just at the moment when
ion that will inevitably mean decline rather than advance if large additions to its endow-
the old economic order has been swept away by the war. The scale of salaries that
few years, and while it did not meet the needs of social justice in pre-war days, it is
of the teaching staff at the Institute, after an expensive education at a first-class
salary of $2000, and about forty years of age when he becomes a full professor at
out of a Staff of nearly three hundred receive the maximum salary, which is $5000."

es prevails in most of the colleges and universities in the country, but the inade-
es from most other educational institutions in having its Staff made up mainly of
ide the academic field. Especially now that the value of the technically trained
the case; the members of the Institute's Instructing Staff are constantly being
salary scale as is outlined above, it is not surprising that many of them go and that

nd if it continues for ten years, the results will be disastrous. By that time, the Insti-
view who have other sources of income than the Institute. The success of an educa-
tility of the men that compose the organization, and Technology not only cannot
umber of able and enthusiastic teachers. Even with the scale of salaries referred

million dollars, and it requires the simplest calculation to demonstrate that any
in large additions to the Institute's endowment."

Richard MacLauren
VOO DOO

The Ladies
With Apologies to R.K.

I've taken my fun where I found it,
I've roamed and ranged in my time.
And I've had my picking of sweethearts
And four of the lot were fine.
One was a girl from Chicago,
A millionairess from Nome,
One was the daughter of my colonel down South,
And one is a girl at home.

I ought to know lots about women,
But taking them all along,
You never can tell 'til you've tried them
And then you are likely wrong.
There's times when you think you mightn't,
And times when you think you might,
But I always play safe and don't go too far,
'Cause then I know I'll be right.

My first girl was Barbara Kelly;
I met her down at the beach.
I asked if she'd be my teacher,
And she sure knew how to teach.
She taught me to hold a girl's hand
As if I thought that she were
The only girl for whom I could ever care.
And I learned about women from her.

And then I met Dorothy Farrell;
Her father owned a big mine.
She helped with my education
When I took her out to dine.
She taught me to act politely,
And to be the gallant sir,
And she also taught me the right way to kiss;
So I learned about women from her.

My next girl was Caroline Roland;
I met her at Fort Monroe.
She taught me the best way to hug her,
And just how far I could go.
She showed me all of the clinches,
But just so far, as it were;
For she was engaged to a major in France,
But I learned about women from her.

And then I went home from the Army;
That's where I met Nancy Clyde.
'Twas she who taught me how to love
With all of these arts combined.
Her courses in pets and kisses,
True educations they were,
And how I could do them all at the same time,
So I learned about women from her.

Since then I've had a dozen others,
Now I must pay for my fun.
The more that they all have taught me,
The less I have settled to one.
Here I am, sitting and thinking,
Wondering who the next one will be.
Sobewarned by my lot (which I know you will not),
And learn about women from me.

First Qualm For Freshmen

Blessed is the man that walketh not in the counsel of the unlearned,
Nor standeth not in the way of professors,
Nor sitteth not in the back seat of the classroom;
But his delight is in the laws of old Newton
And on his laws he doth meditate day and midnight.
And he shall be like a grind with his feet in hot water,
That bringeth forth good marks in examination,
Whose allowance doth not wither;
And whatsoever he propoundeth shall be recorded forever.
The unlearned are not so,
But are like sheep which are summoned to slaughter.
Therefore the unlearned shall not stand in the examination,
Nor shirkers in the throng on Olympus.
For the Dean knoweth the way of delinquents;
But the way of the studious continues forever.
Correction to The Tech Bible

Freshmen will do well to heed the following, which may be termed the collected advice of those who have lived and suffered.

Beware a Wellesley girl: she is a walking advertisement for the Inn.

Beware the Smith girl: she is only after a bid to the Show.

Beware a Sargent girl: she has a mighty right and you may get left.

Beware a Simmons girl: she only knows the theory of cooking, so don't let her practice on you.

Beware a Radcliffe girl: she will tell you more than you need to know about Harvard.

Beware an Emerson girl: she is only a bad actor learning the game.

BUT—be good to a Co-ed here; she has a hard enough life, anyway—what with the pros, and one thing and another.

Love's Labor Lost

I tried to fix my program so that I could sleep in the morning, have free afternoons, and the pros. I wanted. The pros. I wanted all held classes at nine, or four. So I decided to think only of hours. I worked a long time. I ruined a shelf of tabular views. I worked another long time. I messed up another deck of tabular views. Then I took the section assigned to me. Another good idea gone wrong.

Artist—That's a beautiful picture.
Wife—I fail to see it.
Artist—But I am willing to admit that it's crude.
Wife—Well??
Artist—Yes, my dear, that's the beauty of it.

Lament of a Co-ed.

My heart is busted. I feel so bad I could cry. Honest I do. And me so young to have all my ideals busted, as well as my heart. You see it's this way. I just saw the man I was so crazy about last term. I can't even bear to think about it—almost. He looked like a nickel's worth of God-help-us in a Fancy Wrapper. And he used to be wonderful. Honest he did. And I saw the man I adored from very afar standing back to the rays of the sun. They (the rays) streamed through them (the ears, which stick out like sugar-bowl handles, though I never noticed it before). It was a terrible sight. Honest it was. This life is so bitter! I just can't stand it!

Rooms

Wanted:—Roomers by young married man, must be unattractive, if masculine.
Room for young man with southern exposure, bay window, and all modern conveniences, including hot and cold running water, etc.
A Word to the Wise.

Good Advice

If you get homesick remember you're a big man now.

First the hot water bottle — then Dr. Rockwell.

Forget the hotel lobby stuff.

Woman and Song

Lay off the Johnnie stuff.

Take off those high school pins! You're a slide rule artist now.

Get out for activities and get what's coming to you!

No matter how many F's or other disappointments GRIN — DOGGONE YOU GRIN.
The Millennium

Year, 1985—
Prof. lecturing to class of Medics at the Harvard Medical School:

"Gentlemen: We now come to the important subject of physical and mental endurance. It is a well-known fact that the human body, as demonstrated by physiological and psychological experimentation, becomes capable of the greatest performance when work is executed only for short periods daily. It can be demonstrated that half an hour a day is the scientific maximum for working hours. More than this leads to a breakdown of the nervous system. Our beautifully high-strung nerves—like the waves of a wireless love beat, throbbing its celestial heartbreaks, and window smashers, out to eternity—our high-strung nerves, Gentlemen, should not be inordinately imposed upon. When the nerves undergo a great strain, the condition leads to a state of logospasm, or even to one of logomania. The overtime schedule of wages now in "Vogue," and the late afternoon "The Etudiants" now indulged in, are our greatest and most insidious handicaps to the rapid advance of our present-day refined and unadulterated civilization."

"Study renders the superciliary muscles indigent and expressionless. A sitting posture transfers a reflex stoop action torque to the uppermost vertebrae, thus giving a longitudinal stress to the upper pleurocentrum. Continued silence, as if listening—without, however, actually attempting to listen to anything more than the whir of the fingers as one twirls his thumbs—this continued silence, Gentlemen, deadens the earsight. So then, in view of what I have just stated, let it become the daily rule of each of you, individually and delectably, not to work or study, or to make love for more than one full half-hour a day.

The class is dismissed—and I want to thank you, Gentlemen, for your considerate attention."

—A mad scuffle, and general movement toward the lecture platform for personal consultation with the professor.

Smith: How's your dog?
Tech: Nope.
That German Language
Mutz.
A Drama by Hinckiedinck.

The audience is requested to remember that in the German language the diphthong "ie" is always pronounced "ee" while "ei" is "il," "au" is "ow."
Ring up Rudolph.

Peoples
Weizgei—A rich limburger.
Hohgen—An Eismann.
Brigitt—His frauze frau.

Scene—Wurstrooom at the Grabenrun Frielunch.
Hohgen and Brigitt seated at a table. Hans shuffling and cutting the uniederm preporatory to dealing them. Enter Weizgei, dressed in true German fashion of Frockcoht, leitpantz and heihatt.
Hohgen (Singhen raghtem)—"Gittaut thewai

Weizgei (Schowenau)—"Ein stein fein rhein wein fuhr mein."
Hohgen—"Gittonten derdood" (to Brigitt). "Wots eten u, crelbahi?"
Brigitt (tierferle)—"My schuh hertz mei tootze."
Hohgen (lairfen orferle)—"Gitterbigar schuh."

(Brigitt grohnh.)
Weizgei (winken)—"O yukid" (Brigitt grinz.)
Hans (buttenin)—"Kaiser doncherwanter beier-
dorg."

Weizgei—"Gnor" (sprucenupp) "Hooz thechhip, naber?"
Hohgen (smoken peip)—"Mei weif."
Weizgei (dedmash)—"Youz tu dein mit mie."
(Sits daum)—"Hans, fisch und apuluss."
Hohgen (sweinischle)—"Minz pei und bieng hier."
Brigitt—(scheile)—"Eiscriem und freideg fuhr Mabel."
Hohgen—"Booz fuhr muh. Eim dreirner kuvud brij."

Brigitt—"Patze is auf der watterwagen. Mein is fizz."
Hohgen (maikenfasiz)—"Stick tu yuhr Unkel-
meik."
Hans (butteninagen)—"Der casch iss du."
Hohgen—"Pumpernickel in der slot, Bihl."
Weizgei (hoppenmad)—"Gotterdammerung."
Brigitt (schocht)—"Norti, norti."

Hans (scardit)—"Der hausel bie pincht."
Weizgei (sneickem uertvit)—"Er—erung, den."
Hohgen—"Ohratz."
Brigitt (gittemen)—"Buhe fuhr u, bos. Solong."
Weizgei (sweetlisimlen)—"Ofer der riffer, deli-
cattessen."

Hohgen—"Kuttitaunt, kids, Kuttitaunt." (to Hans)
"Dohm takemme badmunner."
Hans—"Unemie, Piet."
(Dey llef aut, leitz aut.)

Help Wanted—Apply to Sultan of Turkey.

Aint it the Truth?
She met him this summer—at the beach. She saw him mostly in his bathing suit, and at night when it didn’t matter what he had on. She swam with him in the morning. She went riding and canoeing with him in the evening. She grew very fond of him. She gave him her sorority pin. He went to Tech, and as she lived in Boston, he called her up as soon as he got in. She went to the Copley with him. That very night she wrote him a letter, saying that her sorority sisters were furious with her for having given away her pin, and would he mind returning it? She would have another made for him. He did. She didn’t. That’s all there is. There isn’t any more.

The Cold Germ.

First Long-haired Student: "No wonder I got more dividends from the Coop than you did. I trade at the Coop Barber Shop."
Second L. H. Same: "But that wouldn’t make more than twenty cents difference."

"I had a fall last night that rendered me uncon-
scious for six hours.
"Uh-huh?"
"Yep, I fell asleep."

The PHILADELPHIA

The man of taste need only examine a Stetson Derby to realize why there are more Stetson Derbies sold every year than of any other make of high-grade derbies in the world.

JOHN B. STECSON COMPANY
Philadelphia

TO THE STUDENT BODY OF TECHNOLOGY

We wish to express to you our appreciation of your patience and also of your loyalty to your store.

You showed great patience in waiting to make your purchases, during the opening days. Our sales were 25 to 33 times our normal business and it was impossible to give the service we wished to give.

The percentage of membership to the total registration is as high as in former years and you concentrated your purchases at the Branch the same as former classes have done. This loyal support of your store is what makes for its success.

TECHNOLOGY BRANCH

E. B. NOYES, Branch Manager
G. E. COLE, Manager
Recently a friend traveling in the Orient wrote us telling of his surprise at seeing a well-dressed Chinaman on the street wearing Boston Garters outside his trousers.

Though Bostons are worn in every country in the world, probably nowhere else on a public thoroughfare could he have seen them in use. And even in China this picturesque way of wearing them is unusual.

Travelers know that the Boston Garter is worn everywhere. Men the world over appreciate the comfort and long wear given by the Boston—superior service which is the result of our policy of Quality First.

**Midnight**

*Father* (Unexpectedly arriving at son’s rooming house at school)—“Does Mr Jinx live here?”

*Landlady* (wearily)—Yes—bring him in.”—*Jester.*

*Solicitor*—You don’t think my job a real one? Why, I’m a traveling salesman. I sell brains, not muscle.

*Solicited*—Well, I must say, you’re the first traveling salesman I ever saw that doesn’t carry a sample with him.

—*Yale Record.*

“Wot’s dis here ennui, Bill?”

“It’s when a feller gets so lazy he feels dat loafin’s blamed hard work.”

—*Boston Transcript.*

“Pardon me,” he said, “I bought this shirt here yesterday. However, I don’t like it and I wondered if I could change it at this counter?”

“O, dear no!” she answered, “you’d better go in a private room.”—*Widow.*

*He*—“If you’ll just give me one kiss I won’t ask you for any more.”

*She*—“I’ve heard that request before.”

*He*—“Well, just give me your usual answer.”

—*Jack-a-Lantern.*

*Stude*—“Press this suit?”

*Tailor*—“Sure.”

*Stude*—“I believe I had it pressed here the last time.”

*Tailor* (looking at the suit)—“I don’t know. I’ve only been pressing suits for two years.”—*Penn Froth.*
SIMPLEX STEEL TAPED CABLES

Hundreds of towns and cities today use SIMPLEX Steel Taped Cables to distribute current for street lighting. Satisfactory service is assured because the cables are designed for just this type of underground distribution.

Low cost of installation and maintenance make them desirable from an investment standpoint. Streets need not be torn up; pipes, manholes and catch basins need not be moved, and no conduit is required.

The "Constitution" of To-day — Electrically Propelled

The U. S. S. "New Mexico," the first battleship of any nation to be electrically propelled, is one of the most important achievements of the scientific age. She not only develops the maximum power and, with electrical control, has greater flexibility of maneuver, which is a distinct naval advantage, but also gives greater economy. At 10 knots, her normal cruising speed, she will steam on less fuel than the best turbine-driven ship that preceded her.

The electric generating plant totaling 28,000 horsepower, and the propulsion equipment of the great super-dreadnought were built by the General Electric Company. Their operation has demonstrated the superiority of electric propulsion over old-time methods and a wider application of this principle in the merchant marine is fast making progress.

Six auxiliary General Electric Turbine-Generators of 400 horsepower each, supply power for nearly 500 motors, driving pumps, fans, shop machinery, and kitchen and laundry appliances, etc.

Utilizing electricity to propel ships at sea marks the advancement of another: phase of the electrical industry in which the General Electric Company is the pioneer. Of equal importance has been its part in perfecting electric transportation on land, transforming the potential energy of waterfalls for use in electric motors, developing the possibilities of electric lighting and many other similar achievements.

As a result, so general are the applications of electricity to the needs of mankind that scarcely a home or individual today need be without the benefits of General Electric products and service.
