The
Massachusetts Institute
of
Technology
Cambridge

The Massachusetts Institute of Technology offers courses in Civil, Mechanical, Mining, Electrical, Chemical, Sanitary, and Architectural Engineering; in Chemistry, Electrochemistry, Biology and Public Health, Physics, Geology and Naval Architecture, and in Engineering Administration.

Graduates of colleges and scientific schools of collegiate grade are admitted without examinations, to such advanced standing as is warranted by their previous training.

Address correspondence to
The Massachusetts Institute of Technology.
Most Assuredly our Tech friends

will be interested in knowing that there has recently been released two of our recordings:

1. Bright Eyes
2. Love Bird

There was a young woman named Tredd
Who didn’t know whether to wed;
She asked the ouija
It said, “Can he fija?”
“I WISH I WAS CERTAIN!” she said.

—Frivol

“Isn’t it strange that all those men in the front row are baldheaded?”
“They must have bought their tickets from the scalpers.”

—Jack-o’-Lantern

“Having a bum time?”
“Bored to death.”
“So am I. Let’s sneak away somewhere.”
“Can’t. I’m the host.”

—Siren

Mrs. Dante:—“What are you writing now, dear.”
Dante:—“Oh, Hell, you wouldn’t understand it!”

—Record

Politician to Friend Wife
P.:—“Well, dearie, I was elected.”
W.:—“Honestly!”
P.:—“Well, what difference does that make?”

—Sun Dodger
Mrs. Fox was bragging one day about the large number of her cubs. “How many cubs do you bring into the world at one time?” she asked the Lioness. “Only ONE,” replied the Lioness—“but it’s a LION.”

**MURADS COST 20 CENTS for a BOX of 10 — BUT THEY’RE MURADS!**

MURADS would be lower priced if we left out all or part of the 100% Turkish tobaccos of the purest and best varieties grown—or if we substituted inferior grades of Turkish tobacco.

But they wouldn’t be MURADS—they’d only be Foxes!

"Judge for Yourself—!"

---

*Special attention is called to Murad 20s in Tin Boxes*
In College

or on the way there—
a Student appreciates that quality in his Clothes which will take a lot of punishment and come back good as ever.
That quality we supply.

STETSON

It Never Fails

Lecturer:—"Now when a person is deaf, his sight is more acute, for the law of compensation will work itself out."
Listener (thoughtfully):—"I've often noticed it myself, that when a man has a short leg, the other is somewhat longer."
—Virginia Reel

"Why do you call Harry a night-owl?"
"Because he goes around with a gang at night that he can't see at all if he passes them on the street in the day time."
—Jack-o-Lantern

How About the Bug?

History Prof.:—"Mr. Green, will you describe the charge in which the Russians took the Oder?"
Green:—"Why—why I didn't know they took it, I thought they always had it!"
—Gargoyle

"Our own opinion is that at the rate the authors are going it's only the bead-makers that can affect next year's shows."
—Jack-o-Lantern

Stirring

Marge:—"Gee, but I had a stirring time this afternoon."
Gerine:—"I was at a tea party, too."
—Sun Dial
RUDYARD KIPLING has given the world these immortal lines:

And they asked us how we did it,
And we gave 'em the Scripture text,
"You keep your light so shining
A little in front o' the next!"
They copied all they could follow,
But they couldn't copy our mind,
And we left 'em sweating and stealing,
A year and a half behind.

Carnegie Tech., '20

THE man who gives no thought at all to his personal appearance is almost as foolish as the man who thinks of nothing else. The right collar makes for a minimum of worry about dress.

Curiosity
She:—"What are you laughing at?"
He:—"Nothing."
She:—"Oh, keep it to yourself. (Pause of a second) What is it?"

—Judge

Your Nose Knows
Adam:—"I had a wonderful time at the dance last night. Helen gave me seven numbers.
Eve:—"Does she dance well?"
Adam:—"I don't know."

—Tiger

Tickle:—"See that girl with the 'V' back? Wouldn't she make some cover for a magazine?"
Toe:—"You mean a magazine would make some cover for her."

—Banter

He:—"Yes, I'm getting to be a big gun in the business world."
She:—"Quite right. I hear that they have fired you already."

—Banter

"Sure and they're goin' to run a minstrel show in Ireland, Mike."
"How do you know?"
"Haven't they been burning Cork?"

—Lord Vell
Oh, Of Course

"Do you know Max?"
"Max who?"
"Max no difference."

—Virginia Reel

The other day a man dashed into Grand Central Station with just one minute to catch the Twentieth Century. He made the ticket window in two jerks.
"Quick! Give me a round trip ticket!" he gasped.
"Where to?"
"B-b-back here, you fool!"

—Awgwan

Enthusiastic Artist:—“Have you seen my ‘Descent into Hell’?”
Bored Patron:—“No, but I certainly would like to.”

—Virginia Reel

Barber:—“Your hair is getting gray, sir.”
Customer:—“Well, I’m not surprised. Hurry up!”

—Virginia Reel

Sympathy

Molly:—“Everett said he couldn’t live without me.
Polly:—“He probably couldn’t. He hasn’t got a cent of his own.”

—Jack-o’-Lantern

Mouthings of Mammon!

Back:—“Oh! She’s a terror. I can hear her giving him the very deuce every night when he gets home from the office. And they say he married her for her money.”
Fence:—“Well — money talks!”

—Frivol

Why Don’t You?

School boys and school girls read the TRANSCRIPT for its school news and sporting news.

Why don’t YOU?

College men and women read it for its college and sporting news.

Why don’t YOU?

Business men and women read it for its timely business news and reliable financial news.

Why don’t YOU?

Churchgoers, as well as members of the clergy, read it for its incomparable religious pages.

Why don’t YOU?

Booklovers read it for its expert book reviews and news.

Why don’t YOU?

Housewives read it for the extensive advertising which it carries.

Why don’t YOU?

Thousands of others read it for its pungent editorials, its well-gauged news, its newy pictures, and its many other more than interesting features.

Why don’t YOU?

ESTABLISHED 1828

The school that confines itself exclusively to the preparation of students for the

Massachusetts Institute of Technology

553 Boylston St.
Boston, Mass.

Franklin T. Kurt
Principal
Conversation Reduced to an Art

"'We can't both stay in this house,' she hummed. 'You must pay up or go out in the snow.'"
—Saturday Evening Post

"Why did you send him home so early?" her father asked.
She hummed, "You can't get any loving where there ain't any love."

"That bunch of tenants remind me of my autos."
"How so?"
"Because they are flat-tired."
—Yale Record

B:—"Isn't that man queer looking; he has Pullman teeth."
V:—"What do you mean by Pullman teeth?"
D:—"One upper and one lower."
—Brown Jug

"Why doesn't the lamp of learning burn more brightly in these halls of learning?"
"Dunno; there's surely enough oilcans about the hill."
—Widow
POLLY

I once loved a girl named Polly,
Who was ever so short, sweet, and jolly;
I once gave her a kiss,
Had it not been for this,
We would both have been most melancholy.
Rondeau

That maiden blush, so dearly shy,
Why doth it on her visage lie?
That self-same color of her cheek
Has been there most of Junior Week;
And who may guess the reason why?

Now should I whisper on the sly
And set your mind at ease, thereby?
The reason for it do you seek—
That maiden blush?

Observe, then, and you may espy
Her gown, which is both low, and high!
At which are darted, so to speak
Full many glances, long, oblique. . . .
Well! I'm quite sure that I'd, were I
That maiden, blush!

Sayings I Hate

1. Can't you get another fellow for a friend of mine?
2. Look out for my hair net!
3. Dorothy be sure and get home early. You'll see that she is, won't you?
4. Please keep my powder for me. (They always want it at the wrong time.)
5. I think Democrats are wonderful—so idealistic!

Her Father Made Cigars

He:—"What shall I give my brother for Christmas?"
She:—"Give him a box of father's cigars."
He:—"Oh!—That would be a dirty trick."

Rules For House Parties

(1) Don't kiss the Chaperone — your girl might get jealous.
(2) Rustle your feet and cough before passing secluded nooks.
(3) Always take a Taxi—you might meet a chorus girl you know.
(4) Don't pour punch on your girl's dress — it might not be hers.
(5) By all means, don't get sleepy and go into your own room by mistake.
(6) Don't kick anybody in the hip pocket.
(7) The chimneys are better to sleep against than the eaves.
(8) Take your GOOD pictures off of the wall.
(9) Drain the home brew out of the bathtub — the Chaperone might want a shower.
(10) Write us for our ten standard excuses guaranteed to fool all matrons and Profs.
Wine, Women, and Song

The first has gone, and I never was very musical
so here goes on Women.

"My boy, there are only two kinds of girls now," I told my friend. "There is one species that enjoys reading the ancients; the kind that thinks dancing is silly and can talk intelligently on the Irish or any other question. Contrasting with these are the senseless young flappers who wear nothing especially, can talk on nothing intelligently, and meet you at the door — with hat on and goo-lashes off — with, "Well, where are we going this evening?"

You can not spend your small change on the one because you might meet some one you knew, and you can not spend your small change on the other because she craves Road-Houses and Costly Taxis. Leave them all alone, my boy. You can trust neither brand.

"I believe you're right," said he. And he left with head bowed.

* * * *

I saw my friend at the Prom.

"I have met the perfect girl," he said. "I heard her talking with Doc. Dewey about Einstein's Theory of Relativity and when I called the other afternoon she was baking a cake in the kitchen. We intend to be married after the Tech show, Saturday afternoon. She accepted me there behind the palms." And he introduced me to a wee slip of a girl with turned up nose and dancing eyes. She did seem, indeed, perfect.

* * * *

When she kissed me the fourth time behind the palms I knew that I could not live without her. I hated to seem unloyal to my friend but ah, she had such luscious lips — such soulful eyes, I knew she was true to me, and to me only. I felt as if we were soul-mates that had drifted through the eons together.

* * * * *

I did not mind so much after the seventh dance when I saw her and a slick-haired Junior emerge from behind the palms — perhaps she had forgotten her powder puff. But when I saw her deliberately plant a kiss beneath the nose of an Instructor in Electric Lab. — I hunted up my friend and said:

"My boy, there are only two kinds of women, beware of them both."

"I believe you are right," said he, and he left with head bowed.

Voila!

Lines Written in a Chemical Laboratory

The wind may howl in the chimney cowl
For all that it bothers me;
From a fear built 'round any eerie sound
I'm entirely, totally, free.

Though supremely brave, I am still a slave
To one dread fear, alas;
I become quite ill, and my heart goes chill
At the sound of breaking glass.

The battle's roar in the late World War
Affected me not a whit;
To the steely nerves (like me) it served
As a sedative, a bit.

I could face alone, any Boche plane's drone
Or the dreaded alarm of "Gas!"
But despite all this, my heartbeats miss
At the sound of breaking glass.

I loathe that crash with a loathing pash
For it's death to a chemist's pride
And nothing lacks, when a beaker cracks
To warrant his suicide.

So you know, I think, why my spirits sink
To a bottomless crevasse
When my listening ear may chance to hear
The sound of breaking glass.

P. S.
(I might further state: I was out quite late
With a friend of spirit kin
The other night — and our grip was tight
On a bottle of G-rd-n's G-n.
But the streets were wet, and I shudder yet
When I think of what came to pass . . .
My face went gray, and I fainted away
At the sound of breaking glass!)
“Nutson” my companion said suddenly, “how many steps are there from the floor to our landing?”

I immediately seated myself in a deep armchair, knowing this was but a prelude to some interesting case.

“My dear Nutson, you don’t observe closely enough. Did you notice the dent in the wall by the third from the last step? Did you see the dome-like cavity? Did your highly developed intellect tell you that that was the spot where Mr. Robson’s head struck, when he came here two days hence to collect the rent for our quarters?”

I instantly knew that something important was to follow. I looked around the room to find a client. Not even one was visible. There were no bent pokers or loaded sticks with bloody ends. No old shoes were under the table. I peeked stealthily at the closet door.

Bedlock was observing an official looking document through a powerful lens. “Ah,” said he, “the chain of reasoning is as clear as crystal. The police! the police!”

He then slowly crawled on his hands and knees over to my chair, only stopping on the way to turn out the gas. He handed me the documental paper saying “Read, read.” I quickly picked up my hat, and lighted a match. Shading the match with the hat I began to read.

“By the order of the police of the United Kingdom, Bedlock Jones of ninety-nine (99) Baker Street is hereby summoned to appear before the Court on the 9th day of April in the year of our Lord nineteen hundred nineteen against a charge of assault and battery and non-payment of rent. Charges made by Mr. I. Robson.”

How did you know it was the police, I asked in a low whisper of the genius. “Deduction, my dear Nutson,” said he. “Today is the 10th day of April. I was not in court yesterday. My brains told me a cop would come for me soon. While you were reading I heard the black cat that sleeps on the eighth step from our landing, squeak. Two days ago a two hundred and eighty pound case fell on her tail and she did not squeak. To make her squeak the thing that got on her tail must have tipped the scales at more than two hundred and eighty pounds. The only thing that weighs more than two hundred and eighty pounds and could climb our stairs is policeman Moriarty. Immediately, I knew it was he by this simple series of deduction.”

“Wonderful,” I cried, “Where shall we sleep tonight?”
OFF-STAGE VOICE:—“Daughter, Daughter, Isn’t that young man gone yet?”
DAUGHTER:—“No, father, but I’ve got him going.”
Our Own Theatrical Reviews
“Way Down East”

I
Midnight
An overworked wind machine
Blowing quantities
Of chill
Asbestos snow about.
The wind blows....
The gentleman in the orchestra pit gesticulates wildly.
He thinks he is Agide Jacchia,
But just between you and me
He isn’t.

II
Waterfalls.
Peonies, peonies,
And moreover,
The fair green-gold of summer-time.....
The honest farmer boy with the glistening locks
And the Ritz-Carlton manners;
Lillian of the wistful mouth
And the pathetic eyes
And the spun-gold aureole.....

III
Mock weddings.
I thought they gave those up long ago,
Along with bustles and pink tights;
Divorces are so easy nowadays, my dear!.....
Ha! ha!
See the Professor chase the pretty butterflies.
I bet Lillian wishes she was chased, too.

IV
Well!
It must have taken them a long time
To get all those pieces of ice
Sawed up so nice and square.
Don’t you love to play tag on ice cakes?
But suppose
The center of curvature of those falls
Had been different!

V
It was so you that wanted to come!
How
Did you expect me to know the seats were two
berries...?
The chairs were good and deep though...
Get away with murder!
Absolutely, old bean!
Sa—ay! when she saw Lillian in that.....
Sure! I could have,
But I hated to take advantage of her innocence.....
You know how it is in a big city.

Our Own Unexpurgated Dictionary

Alcohol: A preservative for everything except secrets. (See Volstead.)
Beer: A beverage composed of percentages, malt and hops. May be either lager or logarithm.
Soul-Mate: See O’Sullivan.
Pajamas: A two-cylinder night gown.
Age: (a) The thing that makes good whiskey.
(b) The thing that makes good liars.
Course XV: Technology’s Harvard Course.
Faculty Votes: The only votes Harding didn’t get.
Chemistry: A brand new suit.

A rag, a bone, and a hank of hair
And you expected a queen.
Now I ask you, ain’t it always the way
With a date that’s sight unseen.

I entered a restaurant and asked for soup
The waitress was young but a terrible goop
Plato, Plato, Plato—what,
This looks like an oyster but I guess it’s not.

Moving Picture Stars.
The kind of girl you want to dance with the worst way.

Easier in Korea

In Korea if a man meets his wife on the street he ignores her and passes as if she were a stranger. Other men elsewhere have tried this from time to time without success.

First Particle of Dust:—“Hasn’t it been a busy, windy day.”

Second Ditto:—“Yes, the crowds of men near my corner kept me in the eyes of the public, too.”

Chorus of Vacationing Tech Studes
(The memory of the late Sir William S. Gilbert is apologized to.)

* * *

When thoroughly tired
Of being required
To slave for a science degree — degree,
With chemistry sated
And physics inflated
Away from our studies we flee — we flee!

From Thermodynamics
Or Glass-and-Ceramics
To thought of vacation
Brings wildest elation.
So come, Amaryllis
Come, Chloë and Phyllis
Your slaves at the Copley are we!

That’s The Spirit

We’re planning to go to the Junior Prom,
My wonderful girl and I.
I hope that she feels the spring everywhere,
I trust she is hearing the cry.

I hope that she’s happy and careless and free,
I hope for that delicate air,
I hope that her head is all in a whirl
With her feet dancing tunes light and fair.

I’m writing this “pome” in an Ec. 60 class
But look forward to happier times,
When my wonderful girl is with me again
And we’re acting, not writing, our rhymes.

Here’s to the girl in the one-piece suit,
Dripping from the sea;
Who sits or stands on the hot sea sands,
In front of you and me.
That if you study the night before exams you will invariably flunk.
That a Tech professor has never seen a burlesque show.
That a Tech professor takes in all the burlesques in town.
That a bricklayer earns more money than a Tech graduate.
That if you cut a class the professor will surely call the roll that day.
That if you sit among the grinds and look wise when a question is asked, the professor thinks you know the answer and won’t bother asking you.
That a professor who proves something by basing his reasoning on a hypothesis and supporting his argument by lab-table experiments, is trying to put something over on you.
That a man who goes to Tech hasn’t got time for anything but study.
That the minute a man graduates from Tech he is offered a $10,000 job.
That there isn’t a good looking Radcliff girl.
That a professor’s idea of fun is to sit up late thinking unanswerable problems and hard quizzes to spring on helpless students.
That when a professor asks you a question he expects you won’t know the answer, and is awfully disappointed if you do.
That if you ask something the professor doesn’t know, he will give you a line of drool with technical terms galore, refer to advanced theories and your insufficient preparation to discuss the subject.
That Tech is the hardest school in the whole U. S. and hence in the whole world.
That there isn’t a real joke in Voo Doo and that the funny ones that aren’t plainly cribbed from other papers can be found in Life or Judge dated 1890 or earlier.
That the crowd that hangs around Walker hasn’t any other place to go.
That members of the T. C. A. have worse reputations than ministers’ sons.
That none of the activities managements need a stenographer but keep one—well.
That nobody ever had a good time at a smoker.
That most men who display a slide rule, ostensibly emerging from their hip pocket, can’t work it.
That the Dean, through some mysterious channels, learns how you spend your time, and keeps minute and complete records of every Tech man’s most intimate thoughts and actions, from the time he gets out of bed in the morning, to the time he goes to bed in the evening.
That if the Professors gave only F’s instead of double F’s, the Registrar would save two barrels of ink a term.
That all students of Architecture wear wild painted smocks, spats and long hair, eat marmalade and chocolate eclairs for dinner, lady fingers for supper, and a charlotte russe for breakfast. Live in a studio, and make fudge better than a Conservatory girl.
That triple E is the hardest course in the Institute.
That prohibition has crowded the medical schools so, that very soon two thirds of the population of the U. S. will be M. D.’s and therefore able to write out prescriptions.
That course XV is the course to get a degree in, when you can’t get it in any other.
That “I” could have played “That part” in the Tech Show better than it was played, had “I” only Cared to go out for it.
That all co-eds smoke, tell naughty stories, and raise merry hell, when all alone in the girl’s room.
That fellows who take Chemistry can’t get a joke, unless it is explained to them twice.
That Harvard Bridge is in such condition, that it will fall into the Charles any minute.
That 99 $\frac{44}{100}$% of the students at Tech are commuters and go home every day, some as far as Chicago.
That the fellow who sits next to you in lectures and spills the line about “wild dames” wouldn’t say Boo! to a flapper, if left alone with a real flesh and bone one.
That you can tell an instructor by his dyspeptic looks.
That a man who owns a machine and tries to get through Tech has the chance of the proverbial snowball.
That the fellows with the bone glasses who sit in the front row during recitations, know all about it.
THE ARTIST (carelessly):—"What size shoe do you wear, dear?"
THE GIRL (ditto):—"Well, four is my size, but I wear sevens because fours hurt my feet so."
Now that Junior Wk are about to take rip, I write to you to ask for spread of warning among ingredience. If average student knu true startus of affairs, maybe so he would think 3 or 2 times. First come helva job of obviating girl. It make necessary to disrupt catalogs of several Colleges and Finnish schools for yung women and argify and tell goldfish storys to get girl. After having write several potent letters of gush plus invite, girl's accent is recove and it become umportant to write to Hon. parent for 2000 yen to buy new slipstuck and numberus other things, with flexible on the numberus. Then along come Jun. Wk.

First off are TNT. Rush. It resemble congranulation party of man with ½ pt. or maybe monky londry in hurrikane. One are declined to embark, “Throw the Hon. meat on the floor.” Maybe the nite of same day, Forging Clubs stage Spring Yell at Ht. Somersalt. This must be execute in open face shirt and swallow tail. Should it be so that victum have enuff piastre, he may taxich home in time to oxidize a few snore. Not knowing present disorder of Jun. Wk, it become umpossible for me to confiscate what come next, butt victum must be prepared to pay out the yen quite Horace Fordly. The only thing which are free are Tea Jazz in Walkover. This are entended by Brown Bag Soc. in toto and motion picture rights should be reserved. During some time on calendar, at nearby houseplay, are seriously pulled off Teck Show. Cast is decomposed of men with hysteric ambitions and korus and ballet are bot at Raymond's. Singing are very expressionate and sound like saw striking nails or chissel on emery wheel. Most of comedy takes place behind scenes and should be very humurus. Butt Hon. student shouldn’t stop here. That most magnolius of events are yet to oscillate. The Junior Plamonade at the Cupley Piazza are most umportant convent of season. Preparation for this make painful and give think of sardines in cans. For man, it take about one hour and two dictionarys. It are very aggrevating to tie beau tie around thum 7 times out of 6 tries, and ofenly it requisite french talk to get into collar. For girl, it take 4.2819 hours and 3 hellpers. Hook-up of girl are very extrikate and need strategy and india rubber exposition. Girl are constantly ready in 1 minute which are 2 hrs. long. After temp. have

### A friend of mine,
One Billy Jones,
Was working with some dynamite,
A-blasting out some stones.

The dynamite exploded—
The cause I cannot say—
Poor Billy Jones was scattered
Full twenty miles away.

From Billy's cash they saved a bit—
The rest went to his nieces—
And put a tombstone on the spot,
“Long May He Rest In Pieces.”

Vol. 3  MARCH, 1921  NO. 4
HE minutiae of it have been carefully guarded, and the exact participants remain undiscovered, yet it is known that a small domestic spat occurred to mar the serenity in the East Lounge of Walker, not so long ago. Someone had a dispute over something with someone else (pardon our slight vagueness on details), and chose as weapons for the defense of his honor, chess-men at thirty yards. Apparently, the contest was waged with the precision of a French Duel, for although it did not result in loss of life (and Phosphorus has heard a few expressions of disappointment at this), it did result in the ruin of a lighting fixture, highly valued. News of the catastrophe came out next day, the Tech referred in its deepest editorial tones to the Unfortunate Incident, and Jove himself thundered, using his bolts to lock the Lounges at 5.30 p.m., daily, henceforth.

Ah, well, Phosphorus could have predicted all this long ago, had someone but asked him. He has many times now been witness — and who has not? — to those minor bursts of the mania which seems to attack members of the chess-playing brotherhood. Deep peace, brooding over all Technology, is suddenly shattered by its vicious attack. Shouts, bellowings, shrieks, pounding of tables, backs, chairs — general and devastating pandemonium. Someone has captured a pawn. On this basis, it becomes easy to predict that the loss of a bishop would doom the chandeliers, and the capture of a rook bring about the reduction of the grand piano through kindling to wood pulp . . . . Chess is a good game, but by all the signs, it is overstimulating to Tech students.

LOWLY but surely there is growing up among Technology undergraduates an interest in their college. Not an interest in her curriculum for that has never been lacking and needs no encouragement to grow; but an interest in her teams; in her athletic representation among other colleges. Two men were heard discussing hockey future and the season dope the other day instead of holding a post mortem on a mutual quizz. It is a good sign. It betokens the advent of a natural and healthy interest which has been repressed hitherto.

There is no danger that athletics will ever overshadow the college’s prime purpose. Those shortsighted people who fear this fail to appreciate that, in the very nature of things, a college with the courses that this college has will not allow a man to devote too much of his time to outside interests. They furthermore fail to appreciate that the main value of an education such as Technology gives is lacking when the men turned out by it are not broad enough to make use of its advantages. These points have been harped on until they have become trite, but in the harping good has been done though much remains still to be done. Technology is not trying to turn out scientists; she is trying to turn out engineers. Anything that will broaden an engineer into a man among men is something worth thinking about.

But, to return to the point, we have criticised; we do not retract that criticism. We do, however, commend the M. I. T. A. A. and the T. A. C. for the work they have been doing this winter, for we know that it is for the best interest of Technology to foster and to force, if necessary, her undergraduates to get into any game and every game that will make them, or help make them, all-round engineers who can use calculus and tact with equal ease; who can handle machines and men with equal facility.

PHOSPHORUS is nothing if not chivalrous. Recently some of our more or less valued fellow-institutions have been tremendously exercised over the influence wielded in campus life by the fair ones and some cruel words have been said which Phosphorus grieved to hear. At Brown it seems a trace of blue found its way into undergraduate expression in the form of a righteous protest against the “petting party” which the editorial staff of the Brown “Herald” suddenly brought to light, figuratively speaking.

The morals of the coming generation as reflected on the campus, were all shot to pieces and there was much to view with alarm. The damsels were a menace. Soon the noise of battle penetrated even to Morningside Heights and the Columbia “Spectator” came out with quite a mass of statistics to prove that it wasn’t so at all. The controversy became positively international in its aspects; it even got into “The Tech.”

This may be all very well, but it is not particularly good manners, Phosphorus gently urges. A college undergraduate elsewhere than at Tech really has never enough to do and is thus never happy unless he is conducting a tremendous agitation for or against something or other. This time the subject happened to be women. Well, well let us be moderate. Turn about is fair play. There may be some who believe that the ladies’ presence does not enhance the classroom but you will have to admit that there would not be much to a Junior Prom without them.
Ye First Prom.
May They R. I. P.

In the good old days of Gorgons and Ogres, Fairy Princesses and what-not it is said that a Knight would die happily in the lists if only he had some fair ladye's glove tucked next to his heart. But the women — my it must have been a loveless race, for the difficulties undoubtedly were many. They tell me that castles were few and far between, that travel was difficult and that it was dangerous to be about after dark. Well, for the sake of romance, consider that our heroine is a beauteous maiden — the kind that flickers on the silver sheet nowadays, that takes two or three deep sighs and falls back into any two masculine arms with lips outstanding and eyes expressed (I get a bit mixed up imagining such a girl).

Enter a knight. He probably is a bit weather-beaten and battle-scarred but he's a he any way. So when it gets dark, Olga, the girl, leads him up to the tower room, draws the tapestries and parks on some luscious bear-rugs or such. One can easily imagine what ought to happen. But I leave it to you — wouldn't a stranger Knight have a terrible crust to start unbolting his armor — and goodness knows the temperature of steel is not inducive to the birth of the lyrical emotions, as it were.

I believe I'd rather take a chance on a bit of rouge on my lapel than a rust spot on my shoulder. A lot of other things spring to my mind — but far be it from me to cast reflections on the good old days of Ogres and what-not.

That House Party Girl

Pragmatically speaking
Of aggregate gains
The best girl to take
Is the girl without brains.

If you must take a wise one
With brains — 'tis a fact: —
You're bound to get stalled
In philosophy's tract.

And furthermore, wise ones
Know nothing of love,
Of billing and cooing,
Of stars up above.

And don't take a fast one —
She'll worry you sick,
She'll vamp all the others
And call you a hick.

Beware of the beauty,
Although she's a peach,
For you'll find that the stags
Keep her out of your reach.

And don't take a gusher,
No matter how sweet
Though much we may love 'em
Too much is no treat.

But is she is brainless
Her speed is just right
She'll love just enough
(And the brainless don't fight.)

Pragmatically speaking
Of aggregate gains
The best girl to take
Is the girl without brains.

History of the Club Sandwich

Men have come and men have gone, but the mystery of the correct method of eating a club sandwich still remains a lost secret. It was the custom with the cave-dwellers to suspend the morsels from trees and, after making a successful flying leap, to devour them whole. In the course of social events in the third century B. C. this method was found unbecoming to table manners and was accordingly abandoned. In the reign of Cleopatra a highly efficient method was developed, so they say. The records of this were carried to Rome by Mark Antony where they were destroyed in the great fire of Nero's days. Since then, no method worthy of note has been evolved.

Perhaps few of us realize the importance of this question. More broken engagements and divorces have resulted from the abuse of club sandwiches at parties than from the shimmie dance or from mixed bathing at Newport.

Fortunately for humanity the National Club Sandwich Makers Union has applied for two new and ingenious patents for club sandwich consumption. The first patent is to split the sandwich between courses, as the lettuce and tomato part for salad, toast with coffee, cigars after the meal, etc. The other patent was invented by a Bolshevik soap manufacturer and consists of a fluid which is poured over the sandwich. This fluid reacts with the mayonnaise dressing, forming an adhesive mixture which can be used to stick the sandwich to the plate, thereby making the assimilating process comparatively easy. These two patents should revolutionize the industry and put us once more on a footing with the ancients.
On the beach in Oklahoma
Was a cottage by the sea,
She is resting now, my darling,
(Cher had water on the knee).
Now forty years have waxed and waned;
Dear me! How time does travel,
She rests in peace and solitude—
She sleeps beneath the gravel.

Flapper:—“Did you notice that Johnny Smith bumped into me at least six times during that last dance?”

Sophisticated One:—“Well, perhaps that’s his idea of the way to make an impression.”

Oswald:—“What is the most you ever got out of your car?”
Theobald:—“Oh, about seven times in one block, I think.”

Disillusionment
I glimpsed you in the passing throng
(I glimpsed your back, that is to say)
And thought that I had never seen
So sweet a maid, until that day.

A dainty hat, of bright design
Crowning a lovely, amber head;
A cloak of silver, blue and gray
Sloping from shoulders spirited.

A girdle round a slender waist —
Lord! what a prize I thought I’d found.
I might have loved you all my days . . .
Darn it! why did you turn around?

SHAKESPEARE:—“Ay, there’s the rub.”
How a sensitive young man feels when dancing with one of these new-fangled hair-dressings.

**Perhaps She Went to Smith**

Of course I had met her before. At last year's Prom with some dub — I forget who. So summoning up my courage I write and ask her to the Prom. Will she come? You bet your life she will. And furthermore to make sure that I'll recognize her she'll wear a rose, a red rose, and will meet me in the hotel lobby — with mother — only don't let mother know the purpose of the rose.

She came and we went and Junior week was perfect — except probably for a few others who tried to vamp her — to keep me guessing she encouraged them a bit but I didn't mind that.

There followed a lengthy correspondence, one of these "Daily Letter" affairs, with crosses at the end of each letter, until May, when she suddenly seemed to be growing cold. Finally, Mother stepped in and prohibited our correspondence entirely.

There followed a short note asking would I kindly return her letters and her picture, ye Gods, her picture, after I had fought for three months to get it and had never succeeded she wanted back what I didn't have!

Did I fix it? I did. I got twelve of my sisters best photos and sent them to her sayings:

"I can't remember which of these is yours — pick it out for yourself and throw the rest away!"

"Hang it all, I can't get any traction here," said the oiseau driving the twin-six as he skidded past the two good little flappers.

**The Maid from Athabaska**

She was the Maid from Athabaska,  
And was never known to rue it;  
She loved her luscious hic haec hoc,  
And didn't care who knew it.

She hadn't any family tree,  
She knew not how to blush —  
She roamed the streets, she danced at joints,  
Ate corned beef hash and mush.

She feared not devil, man, or god,  
She'd do anything at all;  
From shooting craps to murder,  
And was never known to stall.

She was the Maid from Athabaska,  
And she didn't care who knew it.  
But —  
When asked to go to a shady show,  
She was too proud to do it!

A crank is a man who gets the idea he is the whole machine. An eccentric, on the other hand, merely thinks he is a crank.
Poor Little Trulya
Trulya Davina
Sweet little thing
Carefully raised 'neath
A fond mother's wing
Watchfully guided,
Schooled in the home
Never beyond its
Fair portals she'd roam
Reading from Walter
Scott and from Dickens
Washing the dishes and
Feeding the chickens.
Trulya Davina,
Prim and demure,
Trulya will be an old
Spinster for sure.

Humorous Anecdote
Dramatis personae
Minister
Gentleman (colored)
Lady (ditto)

Argument
Prospective bride and groom are not known to the minister and so, to perform the ceremony conscientiously, he asks a lot of questions. The man, he learned, had come recently from the South and was working in a hotel in town where his desired bride was a waitress. The following conversation ensues:

Dialogue—
"Have you been married before?"
"Yas, sah."
"Wife living?"
"Yas, sah."
"Where is she?"
"Down South, sah."
"Why doesn't she live with you?"
"Well, sah, she lef' me."
"Why did she leave you?"
"Don't rightly know, sah. I was away when she lef.'"

COURSE X:—"How do you make Ethylene?"
DITTO WIT:—"Feed her at Walton's."
SHE (gushingly):—"Don't you think that talkative women are the most popular?"
HE (wearily):—"What other kinds are there?"
It is only a week from the night of the Prom. It is turning springtime, and the trees are turning green. The birds are singing and each night the moon drifts over the basin larger and mellower than on the previous night — giving promise of the perfection that only a full moon can give on that night of nights, just a week away. Can you blame me when I say that all my youthful fancies are lightly turning to the proverbial thoughts of love?

But, woe is unto me, my fairest flowers are going with other Romeos, my slate of possibilities is wiped clean with no girl in sight. But wait. Didn't my roommate say that he had an extra one? Didn't he guarantee that she would be the best looking girl on the floor, and isn't his word about girls as good as gold? Furthermore, wasn't the picture he showed me enough to take away the breath of even a King?

I'll take her. No girl with such a picture could fail to appreciate such events, and such a moon, or to be just a wee bit sentimental and responsive to the call of spring.

Oh, Boy! She came, and as she got off the train I knew that I had picked a Queen of Queens, a flower amongst weeds. She seems to say very little and feel less, but perhaps that is only a natural shyness at first — perhaps.

The fateful night comes, and the twelfth dance comes. Up to this time I have seen very little of her so I sneak her out of the swirling mass and make a bee-line for the Esplanade. The moon, perfect in color and majesty, hangs, dripping, over the basin. The lights on the bridge, the aroma of my cigar and her presence near me, all enhance by their sensitive appeal my feeling of sublime happiness.

"Isn't it wonderful," I say.
"Yes."

"And doesn't the spring in the air and the soft rustling of the leaves make you feel like the two of us could conquer the world?" (That ought to move her).
"Yes."

"And the smoke of my cigar floating lazily before me makes the path of the moonbeams out there on the water seem like the road that brings happiness to us?" (Could any normal girl resist that line).
"Yes."

"The lights of the bridge and the gentle swish of the waves, don't they make you feel a wee bit sentimental?" (That ought to get her completely).
"Yes."

So I gently slip my arm around her. But does she cuddle near, does she show any responsiveness, does she whisper sweet nothings? She does not.

(In desperation I try a direct attack.)

"Don't you think you could like me just a little bit? Please do, it will help." (Could any human being hold back?)

"Oh, yes, I suppose so, let's go home, I'm getting cold." And she got up and started walking away!

Did I follow her? You guessed it, I did not. But as she passed a solitary policeman a few yards away, I shouted:

"Shove her off the dock, she'll float."

May I see the thinnest thing you have in silk hosiery. I'm very sorry, sir, she's out to lunch.
TRAUMEREI

Blossoms of wistaria swooned in the languor of the star-lit, perfumed night. Out of the velvet gloom there came faintly the murmur of a far off waterfall; the veriest wisp of a breeze stirred the tree-tops — elsewhere there was silence in the darkness. On the sleepy waters of the lagoon floated a few half-blown lotus blossoms, glowing frail and white against the blackness, filling the air with their intangible, evanescent sweetness. Overhead, the spaces of the sky . . .

They were alone, and it was summer.

"Darling," he breathed, "will you always love me?"

"Always, my beloved," came her answer, whispered softly.

"And we shall live, for ever and ever as one soul . . .

one heart?"

"Forever, oh my beloved!"

"Then, . . . kiss me . . . to bind the seal!"

"To . . . bind . . . the . . . seal . . . . . . !"

A noise in the underbrush by the lakeside, the noise of a canoe, dragged up upon a pebbled beach. "Oh!" cried the woman, and clutched at the man in sudden fear.

"Fear not, my Dolores! I shall protect you!"

"Oh, but can’t you hear, can’t you hear. . . . ?"

"Yes! What is it?"

"A man!"

"Who?"

"My husband!"

Suddenly there grated out a man’s voice, harsh and rasping, to shatter the blissful peace of their island refuge.

"Blankety-blank the etaoin shrdlu . . . ."

And then they turned up the Cooper-Hewitts, and shut off the faucet that had been trickling in the next room, and disconnected the electric fan that had been busy stirring the tree-tops; and the property man began to pick up the lotus blossoms, and remove the velvet gloom from its hooks. But the camera man continued to voice his distress to the sympathetic atmosphere, because, you see, he had forgotten to put any film in his camera, that time, and now they’ll have to do that same scene all over again, and the wistaria blossoms will have to swoon once more, and it’s all not going to please the director, who doesn’t know about it yet, very much, nor anything like that, but oh, well! . . . . . . . .

Blossoms of wistaria swooned in the languor of the star-lit, perfumed night. Out of the velvet gloom —

(See top of page.)

Cavendish Entropy Coulomb McSoph
Was born with the brain of an Institute prof.
At the age when most kids are just learning to crawl
He solved heat equations all over the wall.

He did all his thinking in farads and dynes
And soon became one of the world’s greatest grinds.
He came to the ‘Stute and did six years in four
And wept since he couldn’t absorb any more.

Activities he wouldn’t waste his great brain in —
He even got out of Frosh Physical Training.
But as one great debauch he decided to come
His very last year to the wild Junior Prom . . .

He looked like a plumber and danced like a sheep
But the dames flocked around him because he was deep.
He picked him a queen with a carload of jack . . .
And now he clips coupons all day, on his back.

Yes, work is what we all enjoy
As earnestly we view it,
Especially when some other boy
Can show us how to do it.
Editor's Note:—The poem below slipped into our copy basket from some mysterious source. The sentiment expressed has aroused our curiosity so much that we have decided to try it on you and watch the result.

Ye Foolish Virgin Journeyeth to Wellesley

One day a Foolish Virgin from the West
To Wellesley journeyed, there to spend four years
Acquiring knowledge—God knows why!—the best
That Boston offers to this vale of tears.
With deep misgivings and a doubting heart
She came upon the campus—lovely place!
It seemed forever from the world she’d part,
For from the gates this stared her in the face:
‘Abandon hope, all ye who enter here!
Bid Youth good-bye,—to beauty say farewell;
To crush originality, ’tis clear,
Our duty is. Now toll its parting knell.
If you a Wellesley girl would soon become,
Wear spectacles and quickly learn to ride
A bicycle, and when the week is done,
The library must find you safe inside.
Beware of Man—his every thought is ill!
An influence insidious he’ll wield.
He’ll even take you for a walk, until
Your shy young heart has far been led a field.
To save you from his ever-present guile
You’ll find an iron set of rules laid down:
He cannot take you farther than a mile—
(There’s nothing wrong to do inside this town)
Don’t take him near the lake—they say canoes
Were made for love, and such is not for thee.
Be strictly sanitary and refuse
To kiss him,—that would sacrilegious be!”
And on she read, but saw she liked it not.
Nine forty-five, she found, had long been set
For bedtime—and a darned unhappy lot
Was hers who didn’t heed the veiled threat.
With fear and trembling she began the year
And chafed at rules and dull monotony.
The pleasures of the city were so near,
But not considered fit for such as she.
Avoiding regulations was a sport
That gave relief from study’s noisome grind,
And themes pro-Bolshevistic made a port
For Youth’s enthusiastic dream-ships, mined
And laced with nets of dark, rebellious thought.
For to the staid, unlovely maiden prof
Thoughts other than the dry old stuff she taught
Were like a discord to Rachmaninoff.
The Foolish Virgin chafed at discipline:
House Mothers were her vilest enemies—
So many ways there proved to be wherein
She pleased them not, and few in which to please.
Examination time drew near at last.
She burned the Midnight Oil, but all in vain—
They said there wasn’t anything she passed,
(Such cut-and-dried stuff skidded from her brain)
With mingled feelings—joy, and some regret—
She packed her trunk and quickly went away.
They say her room mate’s staying on there yet—
Take pity, Lord, on such as she, we pray!

And so the Foolish Virgin journeyed home.
Life, Love, and the Pursuit of Happiness
Were hers to take wherever she might roam,
In place of Wellesley’s prison-like duress.

Take heed, you others who would thither go!
You may depart “far from the madding crowd,”
But life in such a place will prove too slow—
You’d better go to h—(hush! Don’t speak so loud!)

We are told that Solomon’s wives were numbered.
History has it that eighty-one was a Syrian, and three-forty-four an Arabian. We presume that seven-eleven was a Cube.
General Rules for the Use of the Trolley Car.

1. Have a set time at which you will get the car, be on hand about five minutes early and you will find a whole string trying to sneak past.
2. If the above-mentioned scheme fails to work, here is a sure one — Take out your pipe; fill it and light it. The car will arrive coincident with the first puff.
3. Keep your eye on the conductor when you enter or leave a car, for it is a matter of pride to him to catch you in the door.
4. Never have your fare ready; never give the conductor the correct fare and above all never move out of the entrance until you leave for good, for to do these things marks the outré person, the seeker after notoriety.
5. You will find that if you carefully remove your feet from the floor you will remain standing and thus relieve your feet of your own weight and also of the weight of many others.
6. On the way out, use your elbows and plant your feet decisively at each step. Footprints on the corns of people will make your memory impressive.
7. When your self control gives way, instead of condemning the whole works to everlasting perdition, rejoice and be merry, use the sense of humor that God gave you and read the sign you will find somewhere in the near vicinity.

PUBLIC SERVICE

Ec 58, Lecture

The speaker's talk was like the dress
Mi Lady's wearing, thus;
Short and snappy but cov'ring all
That was int'resting to us.

Hail to thee blithe spirit,
Bewitching Mary Rose;
Who wears her dresses short, to show
Two feet of silken hose.

Considerate Woman

Here's to the girl, the only girl
Of whom I can not joke:
Who says, "Let's not go out to-night."
The evening I am broke.

They Satisfy

I hate to claim some of this drool
That runs sans thought my pen from.
It sounds so feeble and oft' times low,
That I fear for my rep. and then some—but:

The women enjoy these risqué rhymes,
And the men like to read these outré lines.

INVESTIGATE

A good pipe line is essential to every high class power plant.

Valves are a very expensive item in a pipe line.

Are the valves you are using made from new metals, or are they made from old brass door knobs, worn out trolley wires and other junk metal?

Do you know how many valve factories use new metals ONLY?

The W. E. W. valve is made from new metals only, and the metal is composition “M.”

Are the valves you are using made that way?

We invite analysis and inspection.

The heaviest and best regrinding valve made.

Not Acquainted

"Say, is that the moon rising over there?"
"I'm sure I don't know. I'm a stranger here myself."

—Wampus

The one:—"Oh, I say, Jack; I'm dreadfully sorry but I find that the sixteenth I had with you comes during our supper period."

The other:—"To tell the truth, Bob, I was just going to beg off because Marie promised this one to a friend from home."

Both:—"(What luck! There's one less dance to struggle through with.)"

—Widow

1921:—"Did you see that movie called Oliver Twist?"

Frosh:—"Yes, and say, wouldn't that make a peach of a hook?"

—Brown Jug

"Last evening, sir, I distinctly saw my daughter sitting in your lap. What explanation have you to make?"
"I got here early, sir — before the others."

—Judge

"Who will be the next president of Yale?" she asked. He whistled softly, "Rosie."

Give Her The Gas
She:—"This car picks up well on the hills."
He:—"Yes, but I was on the level when I met you."

—Brown Jug

"Nowadays, when a man reaches for his hip pocket, you
don’t know whether it’s a threat or a promise."

—Pelican

Now, I'll Match You
Mike:—"Give me a match, Ike."
Ike:—"Here you is."
Mike:—"Well, bless me, if somebody ain't swiped my pipe."
Ike:—"Dat's too bad. Giff me my match."

—Chaparral

'24:—"How about that two dollars you owe me?"
'23:—"I'll pay you next week."
'24:—"That's what you said last time."
'23:—"Sure, I'm not the kind of a guy what says one thing
one time and another thing another time."

—Chaparral

A Chip of the Old Block
Baby:—"I want my bottle."
Mother:—"Keep quiet. You're just like your father."

—Sun Dodger
Half:—“That coach is a wonderful conversationalist.”
Back:—“He ought to be—he spends the whole season improving his line.”

Banter

As The Day Died
Awgwan:—“What a sick looking watch!”
Punch Bowl:—“Yes, its hours are numbered.”

Siren

City Guy:—“Tell me, how’s the milk maid?”
Country Lass:—“It isn’t made, you poor nut, the cow gives it.”

Cornell Widow

“ARE the farmers allowed to make cider since prohibition went into effect?”
“Surely, haven’t you heard of the freedom of the press?”

Penn Punch Bowl

Judge:—“Where did the automobile hit you?”
Rastus:—“Well, judge, if I’d been carrying a license number it would have been busted into a thousand pieces.”

SIMPLEX STEEL TAPED CABLES

Hundreds of towns and cities today use SIMPLEX Steel Taped Cables to distribute current for street lighting. Satisfactory service is assured because the cables are designed for just this type of underground distribution.

Low cost of installation and maintenance make them desirable from an investment standpoint. Streets need not be torn up; pipes, manholes and catch basins need not be moved, and no conduit is required.

Have You One, Too?

"That chap in Topliff is going abroad to study the trombone."
"Who staked him?"
"Everybody in the dorm chipped in."

—Jack-o-Lantern

This is Not Armenia

Prof.:—"What is the meaning of vortex?"
Abey (excitedly):—"Oh, I know — it's the extra cent on ice cream and movies."

—Bun

Old Robinson (inspecting young R's "personal expenses" account for last term):—"What do you mean by $40 for tennis?"
Young R. (easily):—"Oh, that's for a couple of rackets I had to have."
Old R. (severely):—"Yes, I understand, but I think we used to call them bats."

—The Tiger

Convalescent (to a grateful friend):—"Thanks very much for the brandy peaches. Although the doctor wouldn't let me eat the peaches, I enjoyed very much the spirit in which they were sent."

—Record
The air is composed of molecules. They constantly bombard you from all sides. A thousand taps by a thousand knuckles will close a barn door. The taps as a whole constitute a push. So the constant bombardment of the air molecules constitutes a push. At sea-level the air molecules push against every square inch of you with a total pressure of nearly fifteen pounds.

Pressure, then, is merely a matter of bombarding molecules.

When you boil water you make its molecules fly off. The water molecules collide with the air molecules. It takes a higher temperature to boil water at sea-level than on Pike's Peak. Why? Because there are more bombarding molecules at sea-level—more pressure.

Take away all the air pressure and you have a perfect vacuum. A perfect vacuum has never been created. In the best vacuum obtainable there are still over two billion molecules of air per cubic centimeter, or about as many as there are people on the whole earth.

Heat a substance in a vacuum and you may discover properties not revealed under ordinary pressure. A new field for scientific exploration is opened.

Into this field the Research Laboratories of the General Electric Company have penetrated. Thus one of the chemists in the Research Laboratories studied the disintegration of heated metals in highly exhausted bulbs. What happened to the glowing filament of a lamp, for example? The glass blackened. But why? He discovered that the metal distilled in the vacuum depositing on the glass.

This was research in pure science—research in what may be called the chemistry and physics of high vacua. It was undertaken to answer a question. It ended in the discovery of a method of filling lamp bulbs with an inert gas under pressure so that the filament would not evaporate so readily. Thus the efficient gas-filled lamp of today grew out of a purely scientific inquiry.

So, unforeseen, practical benefits often result when research is broadly applied.
