

18.338 Eigenvalues of Random Matrices

Problem Set 1

Due Date: Wed Feb. 13, 2013

Homeworks

Read chapters 7 and 9 of the class notes. The first problem set will be handed out on Monday.

Comments on the readings are a required part of the homework! (and also gratefully appreciated).

Please comment about what you have read as if you were writing a substantial referee report. We want to know if there are any errors of any kind of course. Also and perhaps more important, we want to hear comments of style. Furthermore, usually there is one place where writing gets harder to follow – I'd like to know where that is for you.

Please hand in hardcopy or email to Bernie Wang (ywang02@mit.edu) or leave in the box outside 2-343.
