COMPUTER SCIENCE COLLOQUIUM

"A Simple Model of Demand Paging, from Multics"

by

Dr. Jerome H. Saltzer  
M.I.T.

Saltzer will present an overview of Multics Memory concepts and follow with a description of experimental measurements which led to his simplified model of patterns by which programs refer to the information stored in the memory.

1:30 pm, Thursday, November 16, 1972  
Spencer Library Auditorium

Refreshments will be served in Room 1 Strong Hall  
after the colloquium

ALL ARE INVITED
