Logistics & Norm Settings

- What to do now?
 1. Turn on your video (if your connection allows it)
 2. Mute your mic (unless you are the active speaker)
 3. Open the “Participant” List
 - Make sure your full name is shown
- If you have a question:
 - Use the chat feature to either write the question or to indicate your interest in asking the question
 - We will be monitoring the chat
 - Unmute -> ask question -> mute again
 - Once done asking/answering, please state “Done” to clearly mark it (helps translation/moderation)
 - Same procedure for answering questions
- This lecture will be recorded. It will only be accessible to people in the class

Why Contact-Tracing Apps Haven't Slowed Covid-19 in the US

Lack of coordination, test shortages, and mistrust of technology have hobbled what looked like a promising innovation.

England's long-delayed COVID-19 contacts-tracing app to launch on September 24

Internet-of-Things

Convergence of micro-sensing, computation, and communication that allows us to:

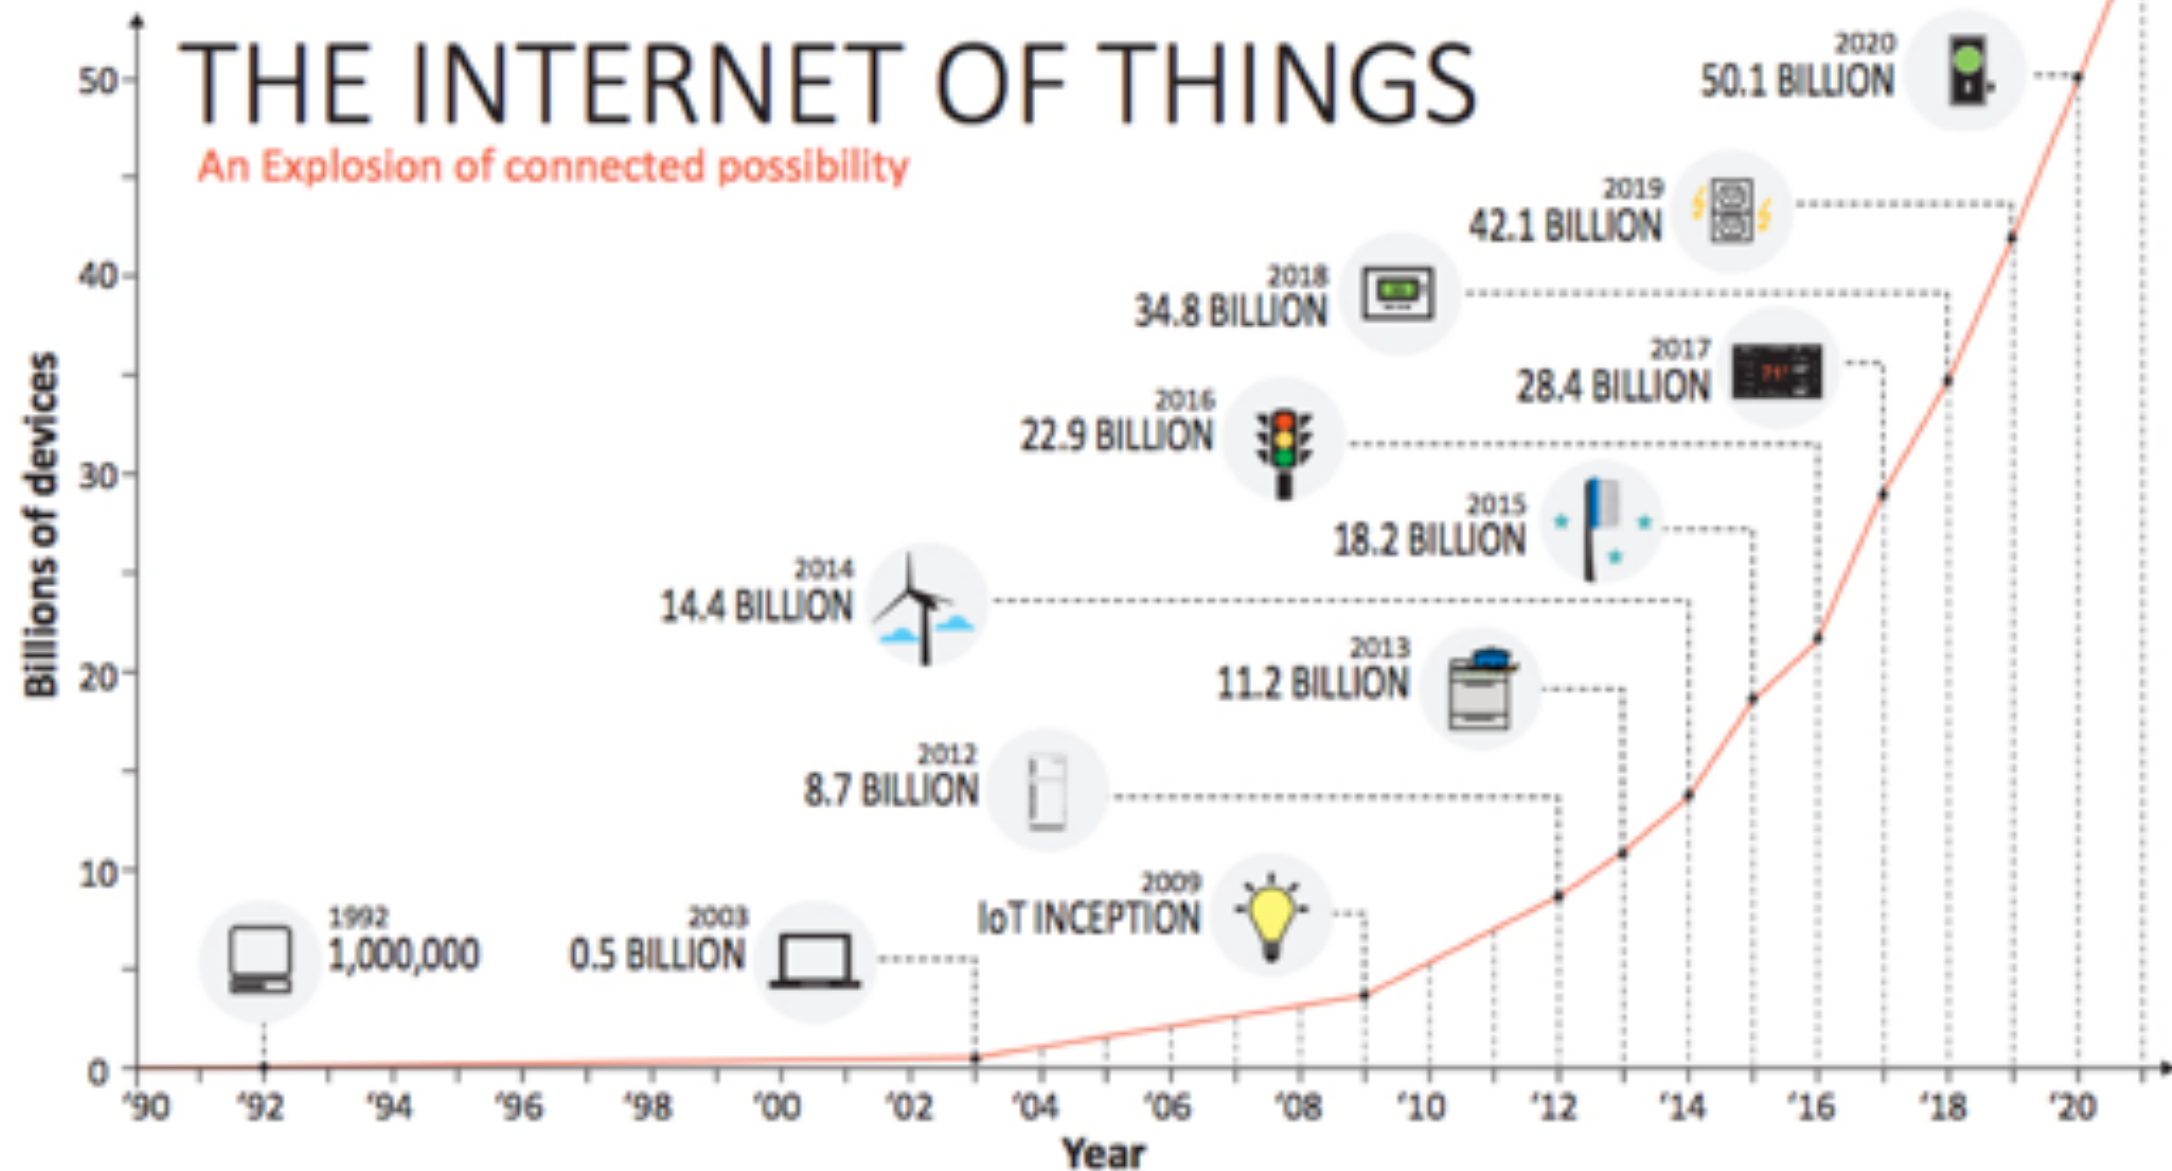

- *Acquire (sense)* data from the environment
- *Pre-process* data locally
- *Deliver* data to servers
- *Draw inferences* and *provide insights* about the world from the data using computational techniques
 - Sensor fusion, data integration
 - Signal processing
 - Machine learning
- *Control* actions in the environment

Example: GPS

Focus of class: Foundational knowledge + emerging technologies (wireless+mobile)

THE INTERNET OF THINGS

An Explosion of connected possibility

IoT is Transforming Industries

Transportation & Smart Cities

Medicine

Smart Homes

Health & Wellness

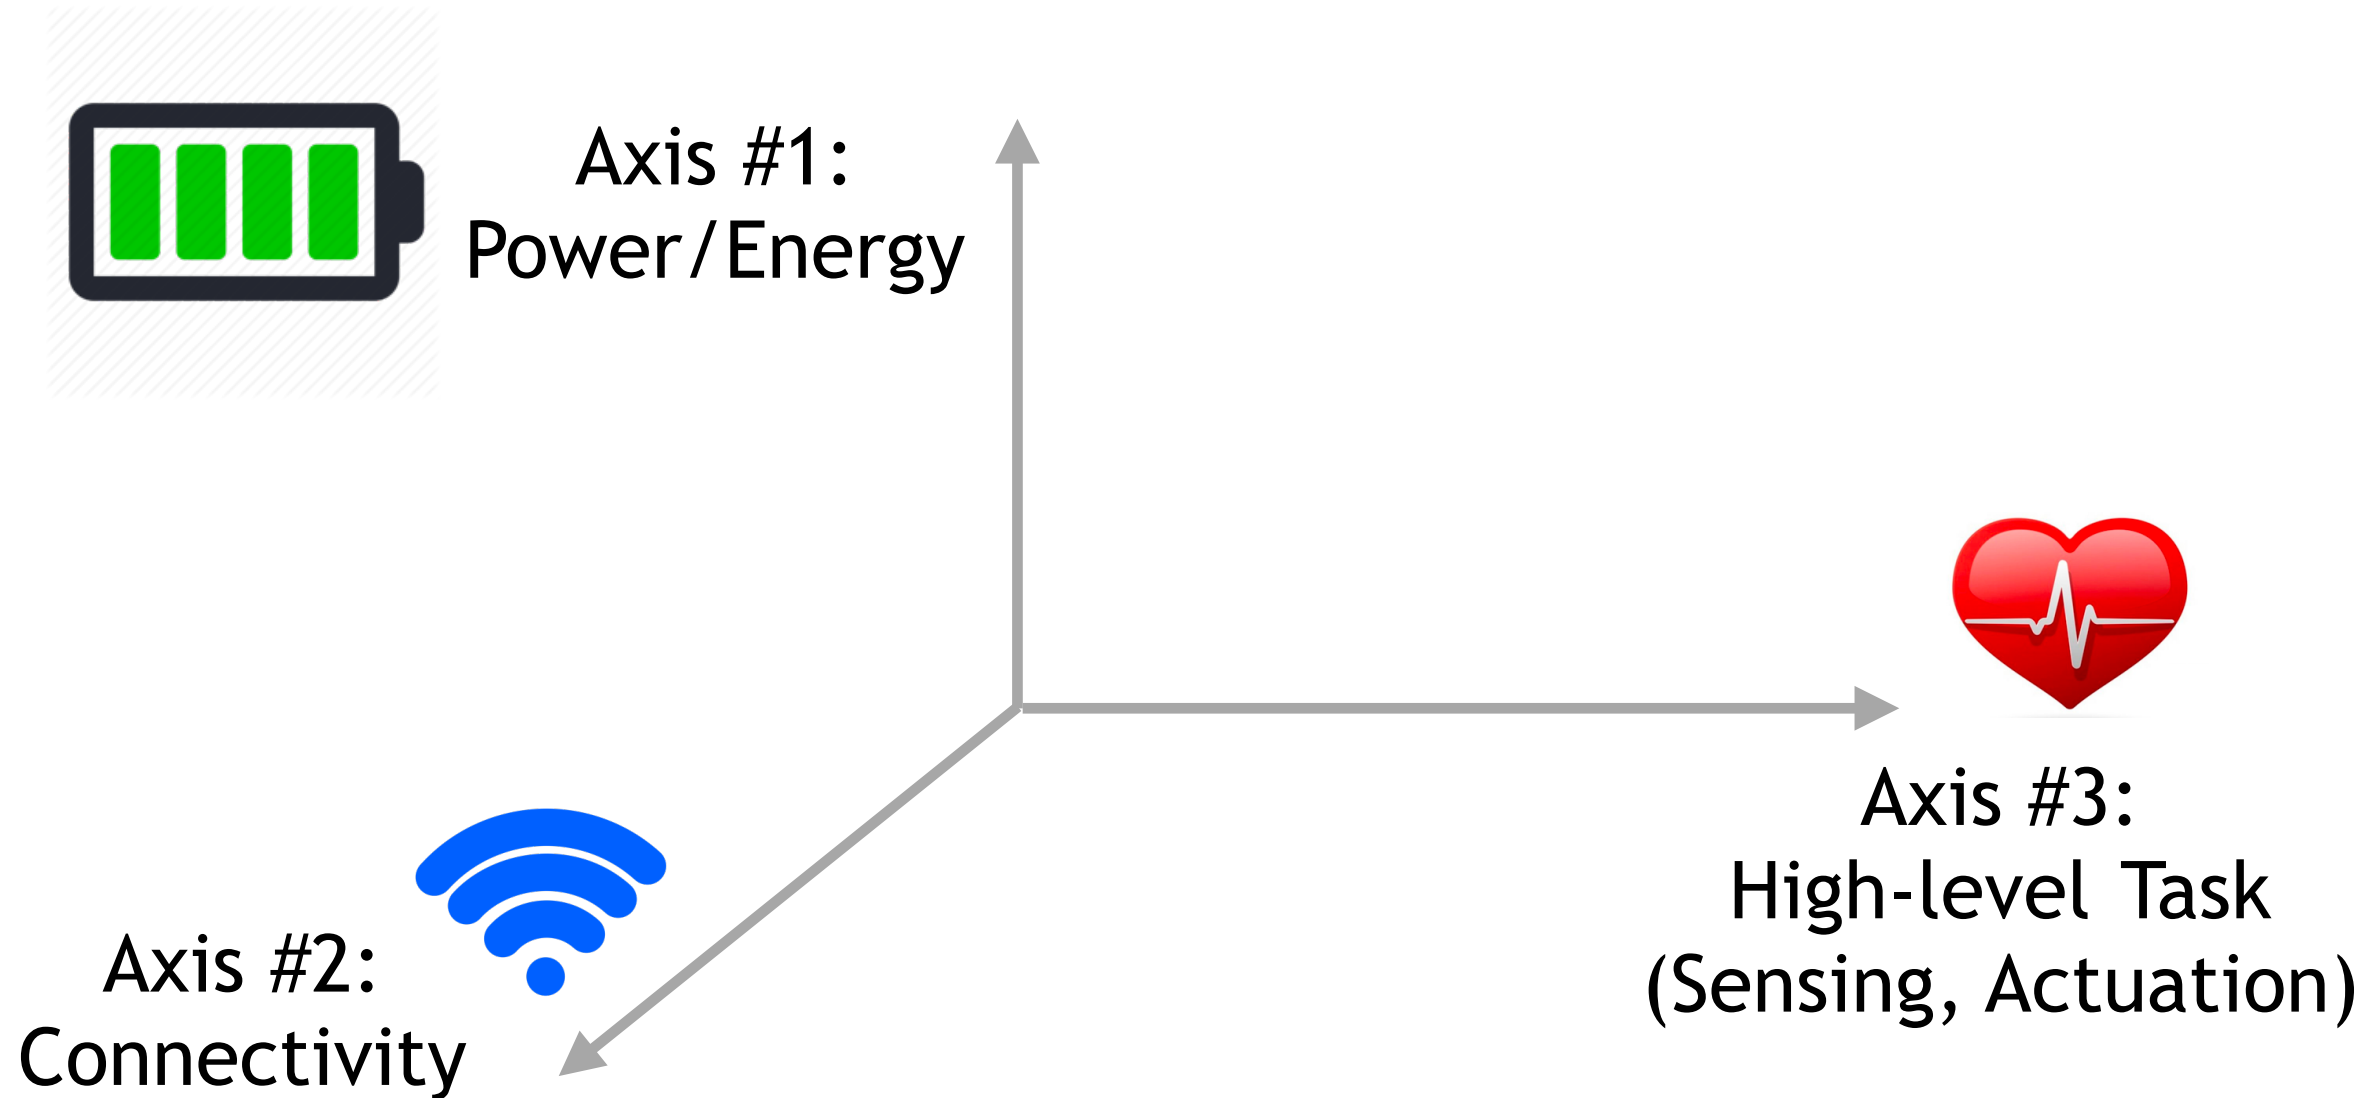

Connected vehicles

Precision Agriculture

Main Components of IoT Systems

Axis #3: High-Level Task (Sensing, Actuation)

WHAT?

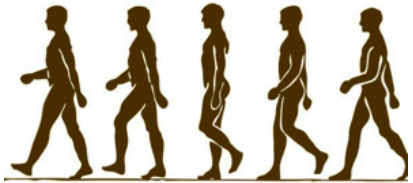

(1) Locations

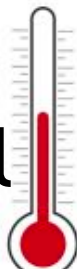

(2) Health

(3) Activity

(4) Environmental

(5) Autonomous

HOW?

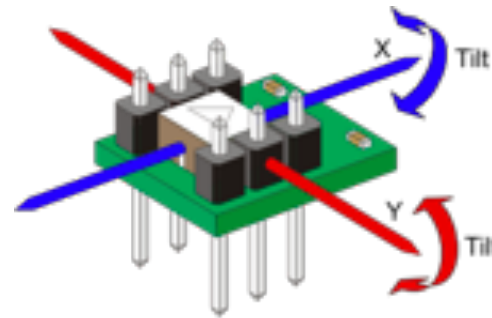

(1) Radio

(2) Acoustic/
Ultrasonic

(3) Inertial

(4) Visual

Axis #2: Computation & Connectivity

HOW do we obtain and process information?

(1) Networking

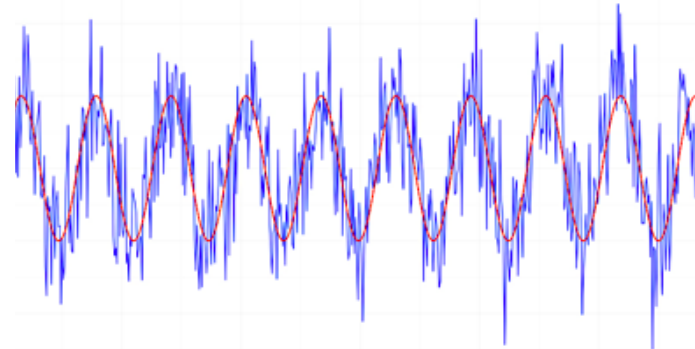

- Connectivity
- Communication

(2) Data Management

- Storage
- Queries

(3) Signal Processing & Inference

- Digitization
- Inference & Machine Learning

(4) Security

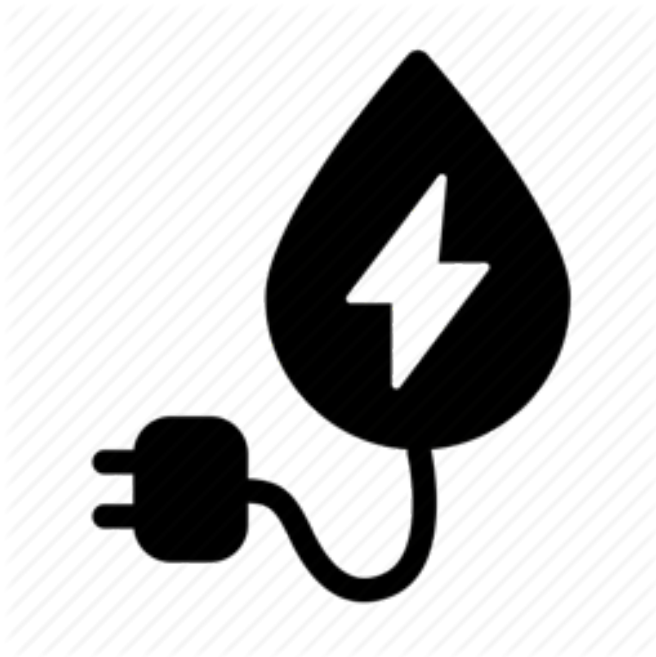

- Digital, Analog
- Trust, Privacy

Axis #1: Power/Energy

HOW will we power up the nodes?

(1) Infrastructure

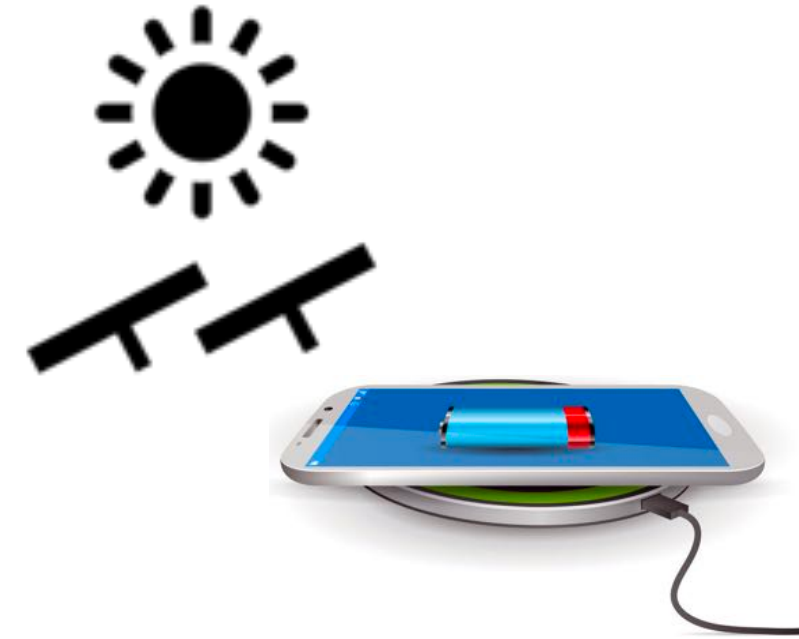

- Electricity, Network

(2) Battery

- Rechargeable/Non

(3) Energy Harvesting

- Ambient, Wireless power
- Solar, Waves, Human Activity, RF

IoT System Architecture

Axis #3: High-Level Tasks

Axis #3: Computation & Connectivity

Class Format

- **Building the Foundations**
 - Sensing: Localization, Contactless
 - Connectivity: BLE & Communications
 - Power: Energy Harvesting and Backscatter
- **Seminar Series**
 - Acoustic Tracking and its Applications
 - Smart Surfaces for Wireless Networks
 - IoT Security
 - mmWaves: 5G and Self-Driving Cars
 - Underwater Light Communications
 - Mobile Health
 - LoRa City-Scale Wireless Networks

MIT IoT Seminar Series

Prof. Lili Qiu

Reading & Reviewing Papers

Seminar Series + Discussions to
Unpacking Tech & Societal Implications

Class Project

Logistics

Grading:

- 1 Course Project (70%)
 - Proposal (10%); Progress Report 1 (10%); Progress Report 2 (10%); Presentation (20%); Final Report (20%)
- Reading Questions & Participation (30%)
 - Includes submitting reviews before every lecture (15%)
 - Participation via Attendance+Interaction (15%)
 - May skip one review without affecting grade

Website: <http://www.mit.edu/~fadel/courses/MAS.S61/>

Piazza: <https://piazza.com/class/kec1m9mhrjy61k>

- Ask questions about lectures, labs, etc.

Fadel & Reza office hours will be posted soon (appointment for now)

Readings

We will read 1-3 papers/references per class:

- Everyone is expected to read the papers in advance
- Submit a short review of the required readings by midnight the night before the class
- Say something that is not in the paper

Submit Reviews here:

- <http://www.mit.edu/~fadel/courses/MAS.S61/reviews.html>

Projects

- All projects involve system implementation
- Work in groups of two (ideally)
- Will suggest project ideas; students can choose their own projects
- Can be (very) related to your research (come talk to me)

Timeline:

- Proposal (1-2 pages): October 7
- Progress Report 1: October 28
- Progress Report 2: November 18
- Final Presentation: December 7
- Final Report (6-8 pages): December 9

We will discuss project updates in class as time permits

Introductions

- Name
- Position (undergrad year, grad year, postdoc, industry)
- Major
- Why are you interested in this class?
- Where are you?

How to Read a Paper

First Pass:

- Title, Abstract
- Figures (illustrations? important results?)
- skim intro & conclusions
- References

Second Pass

- Intro in details
- Overview, related work, or background sections
- Figures in details

Third pass:

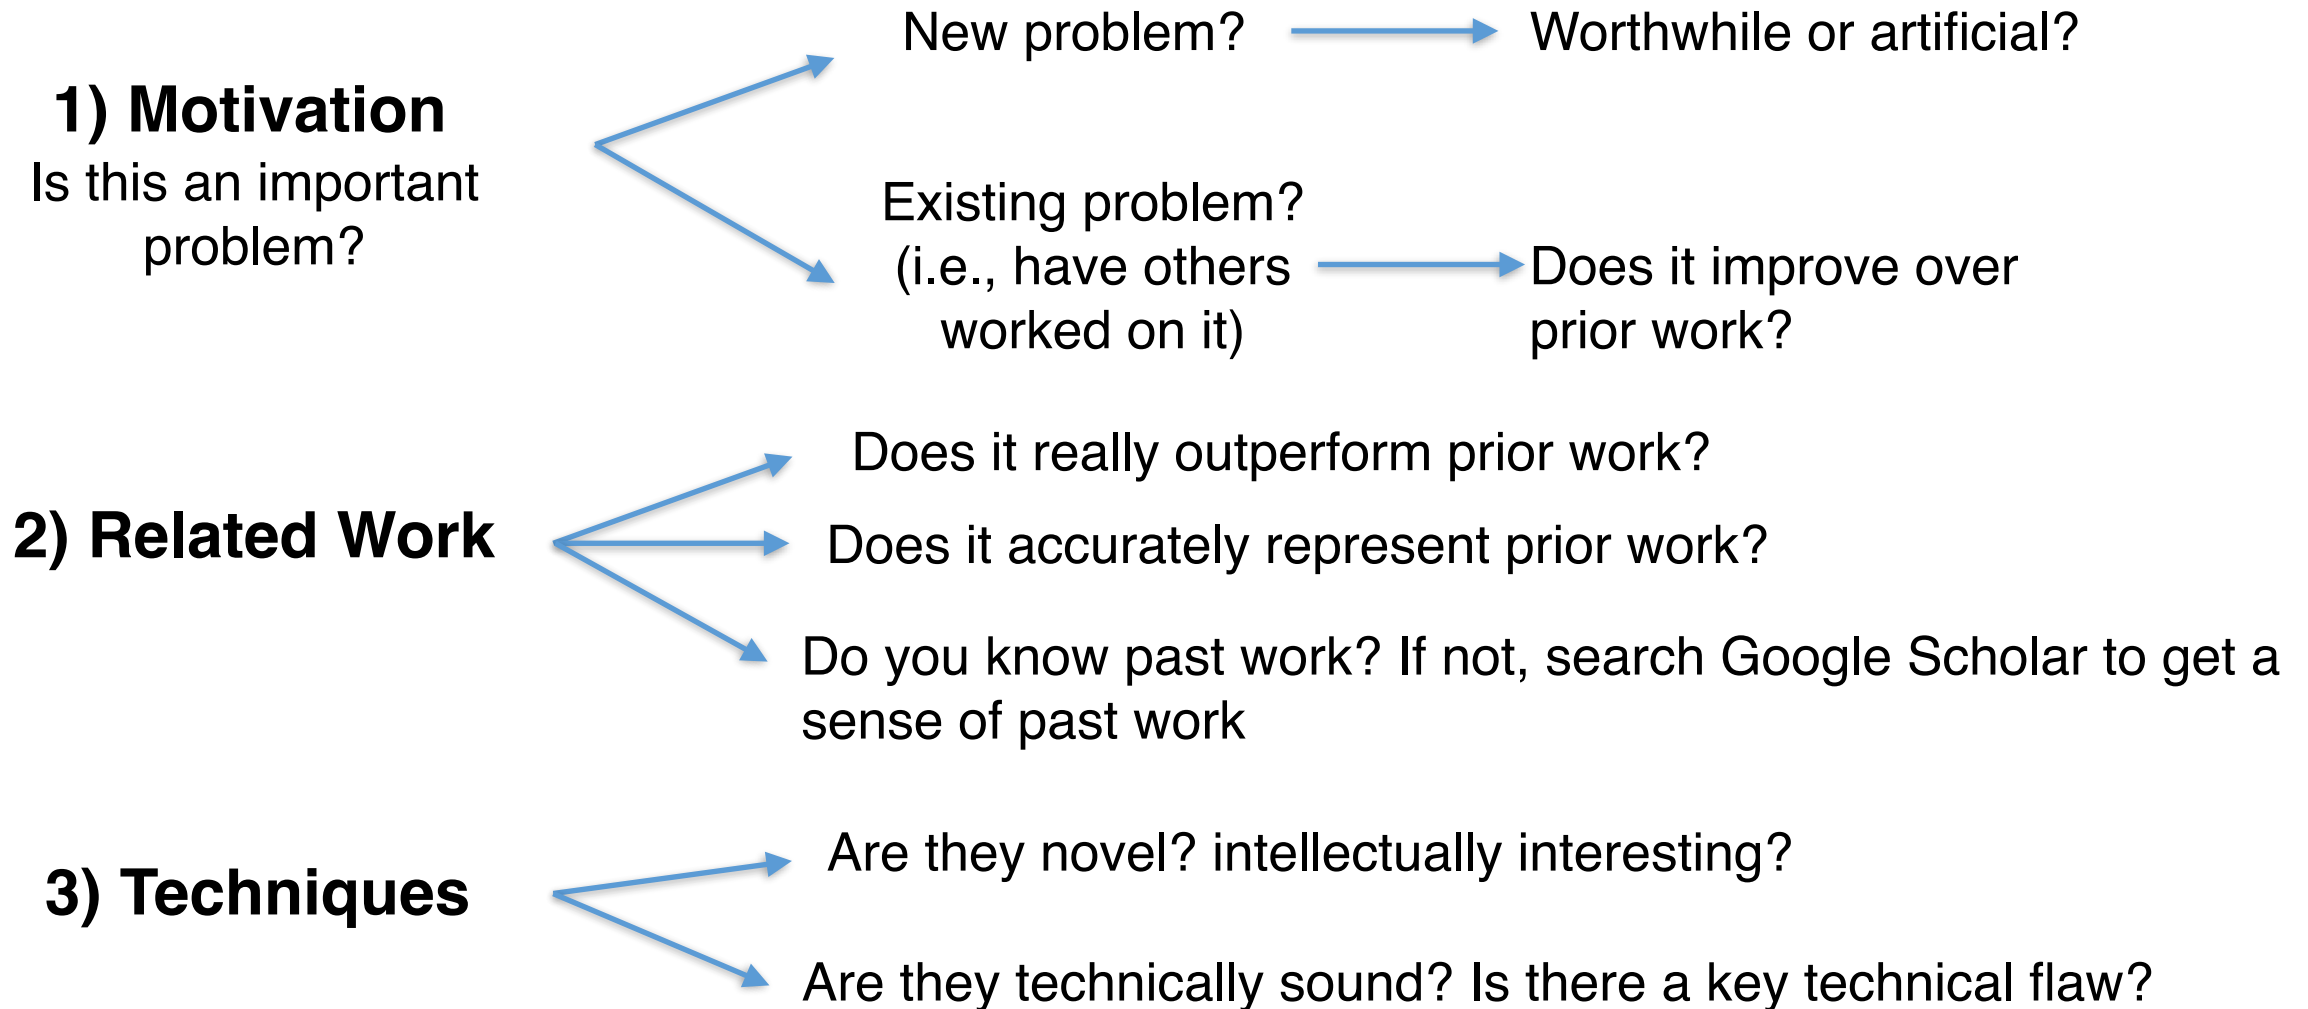

- Read in detail
- Mark references for future read

How to Review a System Paper

How to think when reviewing a paper?

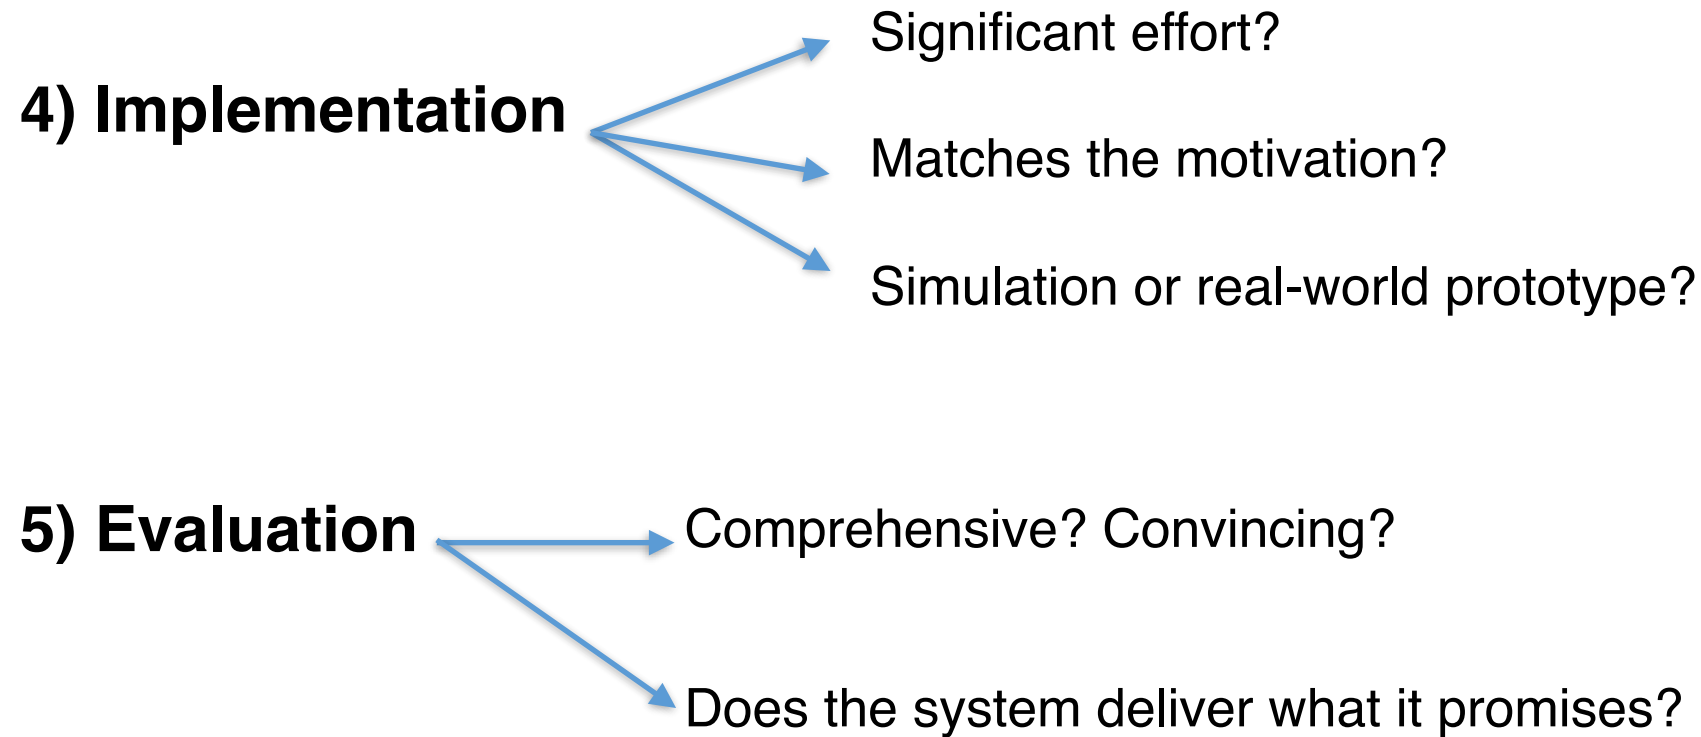

How to Review a System Paper

How to think when reviewing a paper?

How to Review a System Paper

How to think when reviewing a paper?

How to Review a System Paper

How to think when reviewing a paper?

1) Motivation

2) Related Work

3) Techniques

4) Implementation

5) Evaluation

How to Review a System Paper

How to write a review?

1) Summary

**2) Strengths &
Weaknesses**

**3) Comments
to authors**

How to Review a System Paper

How to write a review?

1) Summary

- 5-10 sentences
- If someone hasn't read the paper at all, they should understand what it's about
- Should sound like a "brutally honest and straightforward abstract"

Rough structure:

This paper presents XXX, a system that does YYY. **The goal is to** XXX. The **main challenge** the authors try to address is YYY.

The key idea is to do XXX. The authors do this by introducing/proposing ZZZ

The authors implement (or simulate) their system and **demonstrated** (results) that it outperforms the baseline?

How to Review a System Paper

How to write a review?

1) Summary

- 5-10 sentences
- If someone hasn't read the paper at all, they should understand what it's about
- Should sound like a "brutally honest and straightforward abstract"

2) Strengths & Weaknesses

- Use your answers to the questions of "How to think when reviewing"
- List 2-4 pros/cons
- Each should be a direct statement about the paper

Rough structure:

Pros:

- + Statement 1
- + Statement 2

Cons:

-
-
-

How to Review a System Paper

How to write a review?

1) Summary

2) Strengths & Weaknesses

3) Comments to authors

- Detailed comments to authors
- Elaborate on your pros/cons, areas for improvement, key concerns
- Ask questions about techniques, figures, results, etc.
- Based on the 5 points from how to think as well as technical details

Examples:

- If you listed a weaknesses small delta over prior work, specify in details why with references
- If experimental details are missing, state exactly what is missing and why it is problematic
- Include typos/grammar mistakes, potential suggestions to correct

How to Review a System Paper

How to write a review?

1) Summary

2) Strengths & Weaknesses

3) Comments to authors

- Detailed comments
- Elaborate on your points
- Focus on the 5 points

Examples:

- If you list a small delta of
- If experienced, state
- Include grammar, poten

For the sake of this class, we will drop “comments to authors”.

Instead, you should add a paragraph on “suggestions for improvement”.

- If you could improve this paper, how would you do it?
- How do you envision your proposed technique will improve the work

How to Review a System Paper

How to write a review? (for this class)

1) Summary

2) Strengths & Weaknesses

3) Suggestions for Improvement

Next Class (Localization & Sensing)

1) Required Readings

- **Chapter on Localization** - Covers fundamentals
- **Wireless Sensing** - Sensing from reflections; seeing through walls; deployed

2) Optional Readings

- **Cricket** - More than 100,000 deployed (hospitals); Cited > 5,000 times
- **Radar paper** - Transitioned to real-world products (Microsoft, many startups); Started a new field; Cited > 10,000 times
- **GPS** - how it works
