Department of Earth, Atmospheric and Planetary Sciences 77 Massachusetts Avenue, 54-310
Massachusetts Institute of Technology Cambridge, MA 02139-4307

Curriculum Vitae

Education

2016 Ph.D. Geophysics, California Institute of Technology
Thesis: Mechanics of deformable glacier beds
Advisor: Mark Simons

2010 M.S. Aerospace Engineering, University of Texas at Austin
Thesis: Polarimetric SAR decomposition of temperate ice cap Hofsjökull, Central Iceland
Advisors: Sean Buckley and Scott Hensley

2008 B.S. Aerospace Engineering, University of Texas at Austin

Research Interests

Mechanics of fluids and solids

Glaciology: Deformable glacier beds, ice-ocean interactions, ice rheology, subglacial hydrology, grounding zone dynamics, erosion and deposition of glacial sediments, ice-flow modeling, inverse theory
Landslides: Distribution, environmental and tectonic controls, granular flow

Remote Sensing

Geodesy: Kinematic observations of cryospheric and terrestrial systems, interferometric synthetic aperture radar, time-series analysis, data assimilation
Hazard response: Location and characterization of oil and hazardous chemical spills in marine environments using polarimetric synthetic aperture radar, extent and severity of wildfires using polarimetric synthetic aperture radar

Academic Positions

2018–	Assistant Professor, Massachusetts Institute of Technology
2016–2018	NSF Postdoctoral Fellow, British Antarctic Survey
2010–2015	Graduate Research and Teaching Assistant, California Institute of Technology
2009 & 2010	Graduate Research Fellow, NASA Jet Propulsion Laboratory
2006–2010	Research and Teaching Assistant, University of Texas at Austin

Awards and Honors

2019	Cecil and Ida Green Career Development Assistant Professorship
2014	NSF Earth Sciences Postdoctoral Fellowship
2013–2015	ARCS and Albert Parvin Foundation Fellowship
2012	IEEE Transactions on Geoscience and Remote Sensing Editor's Choice Award
2011–2014	NASA Earth and Space Sciences Fellowship
2011–2013	ARCS Foundation Fellowship
2011	California Institute of Technology Graduate Fellowship

Publications and Presentations

Scholarly articles (* indicates students and ⋆ postdoctoral scholars and research scientists)

28. P. Hunter*, C. R. Meyer, **Minchew, B. M.**, M. Haseloff, and A. Rempel. "Thermal controls on ice stream shear margins". *Journal of Glaciology* submitted (2020).

Invited Presentations

B. M. Minchew. "Insights into glacier dynamics from time-dependent surface velocity fields". *NASA NextGen Airborne SAR Meeting*. May 2020.

B. M. Minchew. "New insights into the mechanics of glacier beds from time-dependent surface velocity fields". *Marine Geology and Geophysics Seminar, Lamont Doherty Earth Observatory, Columbia University*. Feb. 2020.

B. M. Minchew and B. V. Riel. "Observing wave propagation through glaciers using time-dependent remote sensing observations". *AGU Fall Meeting (G015)*. Dec. 2019.

B. M. Minchew. "New insights into the mechanics of glacier beds from time-dependent surface velocity fields". *Special Lecture Series, UiT The Arctic University of Norway*. Dec. 2019.

B. M. Minchew. "Cryosphere Plenary". *Surface Deformation and Change Workshop*. Apr. 2019.

B. M. Minchew. "New insights into the mechanics of glacier beds from time-dependent surface velocity fields". *Weeks Lecture, Department of Geoscience, University of Wisconsin–Madison*. Mar. 2019.

B. M. Minchew. "Insights into the mechanical properties of glacier beds from time-dependent surface velocity observations". *School of Earth and Climate Sciences, University of Maine*. Mar. 2019.

B. M. Minchew. "Inferring the mechanical properties of glacier beds using time-dependent surface velocity observations". *CliMA Polar Climate Workshop*. Nov. 2018.

B. M. Minchew. "Insights into the mechanical properties of glacier beds from time-dependent surface velocity observations". *Smith Lecture, University of Michigan*. Oct. 2018.

B. M. Minchew. "Inferring the mechanical properties of glacier beds from time-dependent surface velocity observations". *Geophysics/Geochemistry Seminar, Woods Hole Oceanographic Institution*. July 2018.

B. M. Minchew. "Marine ice sheet dynamics". *PAOC Colloquium, Massachusetts Institute of Technology*. May 2018.

B. M. Minchew. "The evolution of ice rheology in glacier shear margins". *BiSEPPS Seminar, Harvard University*. Mar. 2018.

B. M. Minchew. "The evolution of ice rheology in glacier shear margins: Crystallographic fabric and thermoviscous effects". *DAMTP Geophysical and Environmental Processes Seminar, University of Cambridge*. Oct. 2017.

B. M. Minchew. "Oceans and ice: How ocean tides influence inland ice flow". *Department of Earth, Atmospheric and Planetary Sciences, Massachusetts Institute of Technology*. May 2017.

B. M. Minchew. "The response of ice flow to ocean tidal loading". *Institute for Theoretical Geophysics Seminar, University of Cambridge*. Mar. 2017.

B. M. Minchew. "Oceans and ice: How ocean tides influence inland ice flow". *School of Earth and Atmospheric Sciences Seminar, Georgia Institute of Technology*. Mar. 2017.

B. M. Minchew. "Oceans and ice: How ocean tides influence inland ice flow". *Department of Earth Sciences Seminar, University of Oregon*. Jan. 2017.

B. M. Minchew. "Observing glaciers in a warming world". *Aerospace Engineering Seminar, University of Colorado Boulder*. May 2016.

B. M. Minchew. "Oceans and ice: How ocean tides influence inland ice flow". *Aerospace Engineering Seminar, University of Texas at Austin*. Feb. 2016.

B. M. Minchew. "Oceans and ice: How ocean tides influence inland ice flow". *CIRES Seminar, University of Colorado Boulder*. Feb. 2016.

B. M. Minchew. "Tidally induced variability in ice stream flow on Rutford Ice Stream, West Antarctica". *University of Washington Glaciology Seminar*. Jan. 2016.

B. M. Minchew. "Rapid changes in glacier flow and what they teach us about glacier mechanics". *Stanford Geophysics Department Seminar*. Dec. 2015.

B. M. Minchew. "Hourly to seasonal timescale changes in glacier flow: InSAR observations as constraints on numerical ice flow models". *Jet Propulsion Laboratory Radar Forum*. Nov. 2015.

B. M. Minchew, M. Simons, S. Hensley, H. Björnsson, F. Pálsson, and P. Milillo. "Multiple glacier surges observed with airborne and spaceborne interferometric synthetic aperture radar". *Geoscience and Remote Sensing Symposium (IGARSS), 2015 IEEE International*. July 2015, pp. 5316–5319. DOI: 10.1109/IGARSS.2015.7327035.

B. M. Minchew. "Glacier flow over deformable beds". *Scripps GP Seminar*. May 2015.

B. M. Minchew, S. Hensley, and M. Simons. "Using UAVSAR to measure seasonal variations in surface velocities and constrain basal mechanics of an ice cap". *UAVSAR Workshop*. Oct. 2014.

M Simons and B. M. Minchew. "Glacier dynamics in a changing climate". *University of Iceland and U.S. Embassy Iceland Public Outreach*. Feb. 2014.

Other Selected Presentations (first author only)

B. M. Minchew and B. V. Riel. "Time-series data analysis". *BIRS Workshop: Mathematical Modeling in Glaciology*. Jan. 2020.

B. M. Minchew and J. Wilcots. "Inferring the mechanics of slip at ice-stream beds using time-dependent remote sensing observations". *AGU Fall Meeting*. Dec. 2019.

B. M. Minchew and C. R. Meyer. "A rate-and-state model of incipient surge motion in glaciers with till-covered beds". *IUGG General Assembly*. July 2019.

B. M. Minchew, S. H. Rosier, and R. Williams. "Inferring the sliding law exponent using time-dependent surface velocity observations". *IUGG General Assembly*. July 2019.

B. M. Minchew and C. R. Meyer. "A new model of incipient surge motion in glaciers with till-covered beds". *IGS Symposium on Glacial Erosion and Sedimentation*. May 2019.

B. M. Minchew, M. Simons, S. Hensley, H. Björnsson, F. Pálsson, and E. Y. Larour. "Influence of surface meltwater on the velocity of temperate glaciers in the early melt season inferred from collocated airborne InSAR, GPS, and *in situ* meteorological measurements". *AGU Fall Meeting Abstracts*. Dec. 2012.

Grants

2020–2022	PI – NEC Corporation Fund for Research in Computers and Communications: Quantifying the Evolution of Stress Fields in Antarctic Ice Shelves by Fusing Data from Multiple Remote Sensing Platforms, Instruments, and Techniques.
2020–2023	PI – NSFGEO-NERC: Collaborative Research: A new mechanistic framework for modeling rift processes in Antarctic ice shelves validated through improved strain-rate and seismic observations. Award number 1853918
2020–2021	PI – Microsoft AI for Earth: Theory-guided discovery of glacier dynamics using deep learning. With Bryan Riel (MIT)
2020–2021	PI – MIT-Germany - FAU Seed Fund: Rift Formation in Antarctic Ice Shelves: Constraining the Mechanical Properties of Glacier Ice Using Time-Dependent, High-Resolution Strain-Rate Fields. With Matthias Braun (FAU)
2019–2020	PI – Earl A Killian III (1978) and Waidy Lee Fund: Improving projections of sea-level rise by (deep) learning glacier dynamics from data. With Bryan Riel (MIT)
2019–2020	Co-I – Microsoft AI for Earth: Theory-guided discovery of glacier dynamics using deep learning. With Bryan Riel (MIT) and Tobias Bischoff (Microsoft)
2018–2023	Researcher – NSF-NERC: Processes, drivers, predictions: Modeling the history and evolution of Thwaites Glacier (PROPHET). Award number 1739031
2016–2018	PI – Spatiotemporal characteristics of basal resistance to ice flow in the West Antarctic Ice Sheet from satellite observations and numerical modeling. NSF Earth Sciences Postdoctoral Fellowship award 1452587

2013–2015 Research assistant – Subglacial mechanics using repeat-pass InSAR measurements and numerical models of temperate ice caps in Iceland. NASA Cryospheric Science award NNX14AH80G, with M. Simons (PI)

2011–2014 PI – Investigating the mechanics of subglacial till using airborne radar interferometry and numerical ice flow models. NASA Earth and Space Science Fellowship

2011–2012 Research assistant – Temperate glacier studies with UAVSAR. NASA Cryospheric Science, with M. Simons (PI)

Mentorship

Postdoctoral researchers

2018– Elizabeth (Lizz) Ultee, MIT EAPS

2019– Bryan Riel, MIT EAPS

Graduate students, as a primary advisor

2019– Faye Hendley Elgart , MIT EAPS (PhD, PAOC, co-advised with John Marshall)

2019– Justin Linick, MIT EAPS (PhD, Geophysics)

2018– Joanna Millstein, MIT-WHOI Joint Program (PhD, Marine Geology and Geophysics)

2018– Meghana Ranganathan, MIT EAPS (PhD, PAOC)

2018–2019 Brindha Kanniah, MIT EAPS (MS awarded June 2019)

Graduate students, as a secondary or project advisor

2019– PhD project co-advisor: Dougal Hansen, University of Wisconsin – Madison

2019– MS project co-advisor: Pierce Hunter, University of Oregon

2019– PhD project advisor: Erik Tamre, MIT EAPS (GGG)

2018– PhD project advisor: Kasturi Shah, MIT EAPS (PAOC)

2018– PhD project advisor: Fiona Clerc, MIT-WHOI Joint Program

2018–2019 PhD project advisor: Julia Wilcots, MIT EAPS (GGG)

Undergraduate students

2020 UROP supervisor: Gabriela Alvarez, Mech. Eng., MIT

2020 UROP supervisor: Jordan Ambrosio, Mech. Eng., MIT

2020 UROP supervisor: Stephanie Baez, Civil Eng., MIT

2020 UROP supervisor: Jack-William Barotta, Math, MIT

2020 UROP supervisor: Anna Chau, EE + Comp. Sci, MIT

2020 UROP supervisor: Adriana Flores, AeroAstro, MIT

2020 UROP supervisor: Meriah Gannon, Env. Eng., MIT

2020 UROP supervisor: Sarah Wells-Morgan, Wellesley College

2020 UROP supervisor: Neosha Narayanan, Mat. Sci., MIT

2020 UROP supervisor: Adelynn Paik, Sys. Eng., MIT

2020 UROP supervisor: Kristopher Vu, Mech. Eng. + Comp. Sci, MIT

2020 UROP supervisor: Joyce Yoon, Mech. Eng., MIT

2015 Project advisor: Benjamin Lauer, Université de Lorraine

2015 Project advisor: Christine Rains, DEVELOP-JPL

2015 Project advisor: Jerry Heo, DEVELOP-JPL

2015 Project advisor: Erika Higa, DEVELOP-JPL

2013 Project advisor: Sandia Akhtar, Caltech

Teaching

2020 Fall	MIT 12.421/12.621	Physical Principles of Remote Sensing (undergraduate and graduate)
2020 Spring	MIT 12.203/12.503	Mechanics of Earth (undergraduate and graduate)
2019 Fall	MIT 12.202/12.502	Flow, Deformation, and Fracture in Earth and Other Terrestrial Bodies (undergraduate and graduate)
2019 Spring	MIT 12.005/12.520	Applications of Continuum Mechanics to Earth, Atmospheric, and Planetary Sciences (undergraduate) / Geodynamics (graduate)
2018 Fall	MIT 12.421/12.621	Physical Principles of Remote Sensing (undergraduate and graduate)

Academic Service

2020–	NASA	Surface Deformation and Change – Cryosphere Working Group
2019–	AGU Journals	Associate Editor, Journal of Geophysical Research: Earth Surface
2019–	MIT EAPS	Task Force 2023 committee member
2018–	MIT EAPS	Communications committee member
2018–	Boston Museum of Science	External advisory committee member
2018–2019	MIT EAPS	Faculty search committee member

Synergistic and Professional Activities

Associate Editor: Journal of Geophysical Research: Earth Surface (2019–)

Scientific Editor: Annals of Glaciology (2017–2018)

Reviewer: Science, Geophysical Research Letters, Journal of Glaciology, Annals of Glaciology, The Cryosphere, Journal of Geophysical Research, IEEE Transactions on Geoscience and Remote Sensing, Earth System Science Data, National Science Foundation

Member: International Glaciological Society, International Association of Cryospheric Sciences, Association of Polar Early Career Scientists, American Geophysical Union, European Geosciences Union, American Association for the Advancement of Science

Notable external committees: Advisory board member, Boston Museum of Science; NASA Surface Deformation and Change – Cryosphere Working Group

Selected Outreach Efforts

- Boston Museum of Science *Pulsar* science podcast contributor
- Gardner Pilot Academy, Alston MA: Introducing 8th grade math students to glaciers and glaciology
- *Adventure! Exploring with Technology* at the Boston Museum of Science
- NASA Climate Day presenter
- US Embassy Iceland outreach on Arctic climate
- Iridescent Learning: Teaching children about scientific concepts

Large-scale Collaborations: Past and Present

- Ice Sheet Systems Model (ISSM)
- InSAR Scientific Computing Environment (ISCE)
- The Sleeping Giant: Measuring Ice Ocean Interactions in Antarctica
- Processes, drivers, predictions: Modeling the history and evolution of Thwaites Glacier (PROPHET)
