

*Aliquo die, et loco aliquo, vivendi inveniemus novum modum, et ignoscendarum rerum modum nos inveniemus sic, aliquo, aliquo loco, loco aliquo.*

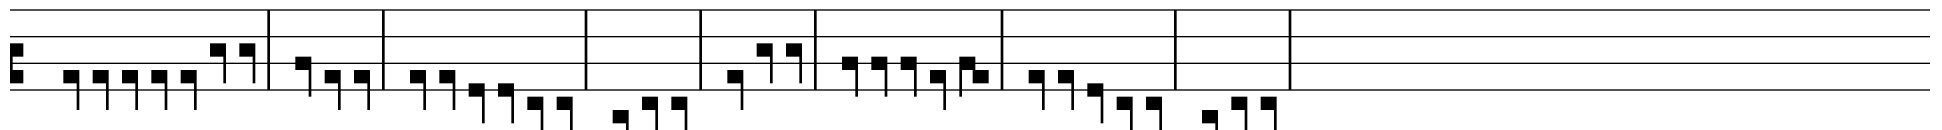

*Amata, me ama, tu me certe scis amare te, semper fidelis ero, sodes igitur ama me, ama me. Amata, me ama, tu me certe scis amare te, semper ero fidelis, sodes ergo ama me, ama.*

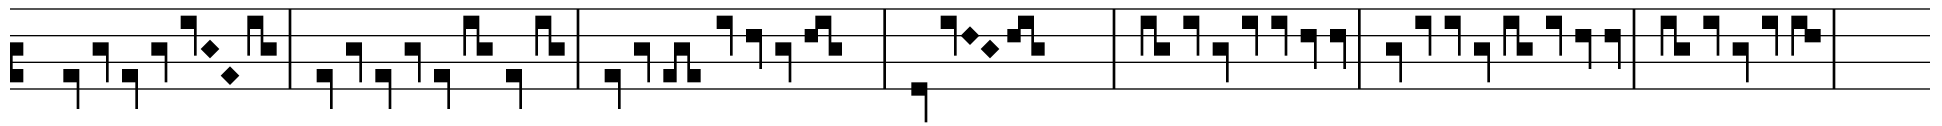

*Bene, tu mihi das omnem et amantiam et turturantiam et amplexus et basia necnon pecuniam tuam. O deliciae, te me amare scis*

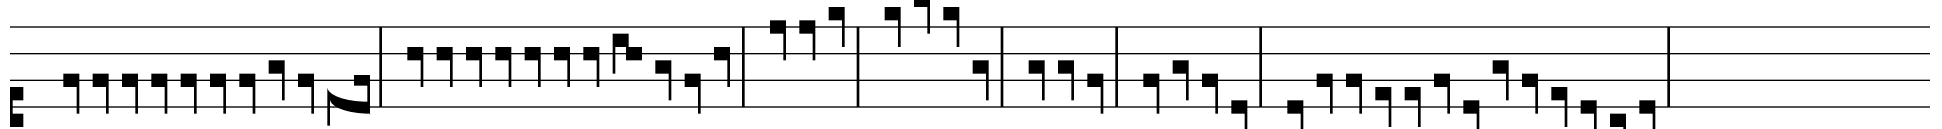

*Convivio meo flebo si volo, flebo si volo, flebo si volo, quoque tu fleres si eadem res sic accideret tibi.*

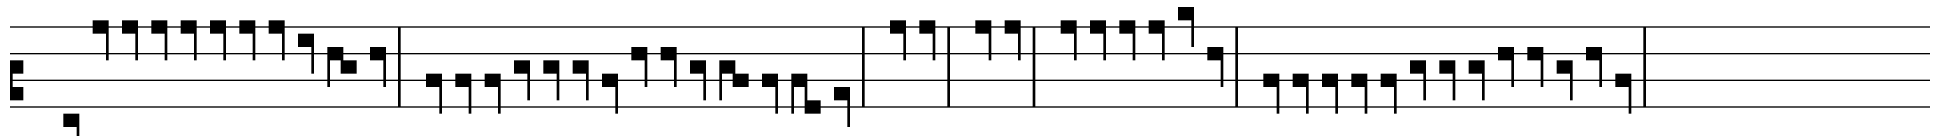

*Dum porro ambulo, quid defuerit miror amori tam nostro forti. Ambulans, nostra specto facta una cordibus juvenibus.*

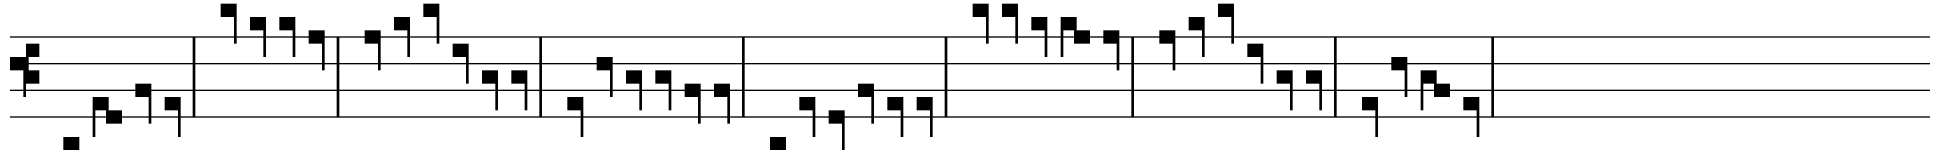

*Is sum ut is es ut ego estis et omnes sumus nos universi quomodo sicut porci a sclopeto currunt ecce quomodo volant ei vide fleo in frusto maizii sedens raedam ventam exspectans*

*Omnia folia sunt fulva et caelum est cinereum, ambulans ego fui hiemis die, tutus calidus quoque essem si esses in urbe angelorum, somnians*

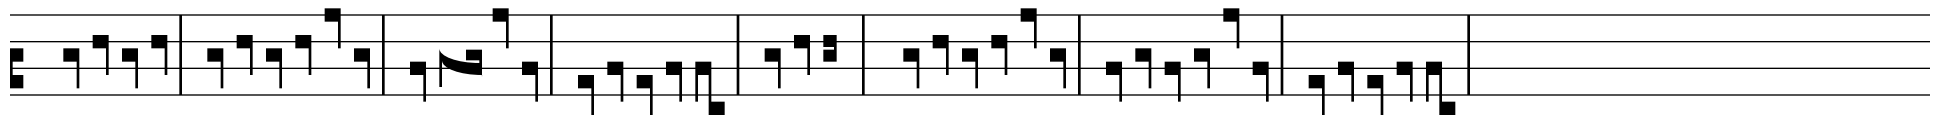

*Postea concurremus, ubi nescio, nec quando. Sed reconcursuros nos scio die aprico. Perge prorsus subridere ut tu, donec caeli caerulei nubes abigent.*

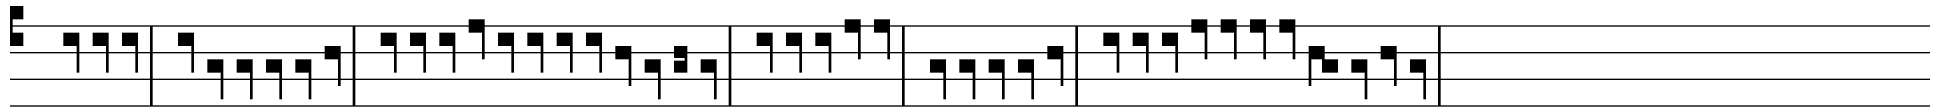

*Si unquam transis oceanum tu ad Hiberniam forsitan clauso die selesbis et lunam ortam supra Cladam videbis et solem Galvia casum.*

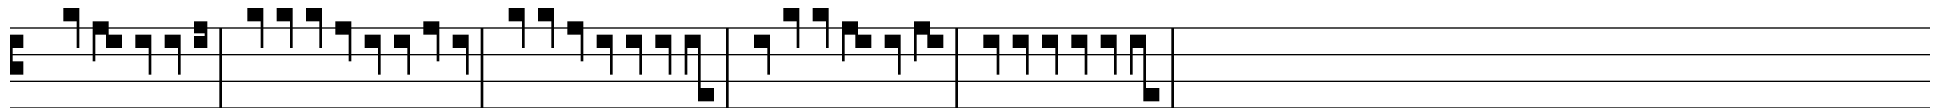

*Sit propitia nostra salva regina, regina nobilis diu vivat, reginam, O deus, tu salve!*

*Specta stellas; ecce micant pro te et omni quid agis fuerunt sic fulvae. Huc adveni; scripsi carmen pro te et is quae agis tu cui nomen fulvum.*

*Tempore matutino quodam fulgebat sol et ego in lecto iacebam mirans si ullo modo mutaret se etiam nunc rufa coma si esset*

*Vir meridionalis, oportet servare caput, noli tuum oblivisci quid librum bonum dixerat, venit mutatio*
