

A large rhino structure is covered with a tight formation of spinning bird rides.

As you approach the rides, you see a sign with instructions and tips:

	<p>How to Ride the Birds:</p> <ol style="list-style-type: none">1. First, before you create your ride, orient it properly using the key below. If this is your first time, then you are a “first time rider”. Make sure the arrows are all pointing up, even if your ride is face down.2. Once you’ve done that, it’s time to assemble your ride!3. Look down at each bird from above with the wings close together. Rotate your bird so that the line beneath the small grid diagram is on the bottom.4. Don’t cut – even if someone tells you to. Lines for these rides go fast.5. Need inspiration? Video is generally better than pictures.6. Feel like riding again? Reset your ride and go back to step 1! You are now no longer a first time rider.7. Last tip: Print at 100% scale.8. You’re all set. Enjoy the rides!
